Supply Chain Planning System of Record (SCP SOR) (the foundational planning layer) supports the “integrate” maturity stage (Stage 3 in Gartner’s five-stage maturity model) of demand and supply planning processes today and in the future. To be fully effective, an SCP SOR is deployed, at a minimum, at the supply chain planning organizational level, as opposed to SCP key functional capability or geographically. It is a best practice to separate different solution sets and vendors within an SCP SOR to prevent fragmenting the end-to-end (E2E) planning capability too much.
