Abstracts

Surgeons wear surgical gowns and helmets during surgery. Surgical gowns and helmets protect surgeons and patients from surgery and post-operative infections. Gowns and helmets provide optimal levels of protection by reducing the transfer of bacteria from the skin to the surgeon. Surgical clothing and helmets must be used because microorganisms can remain on the skin even after a rigorous hygiene and disinfection process. During surgery, the gown and helmet protect the staff from bodily fluids, blood, saline, urine, and other chemicals.
