Abstracts

Betulinic acid is a naturally occurring pentacyclic triterpenoid which has antiretroviral, antimalarial, and anti-inflammatory properties, as well as a more recently discovered potential as an anticancer agent, by inhibition of topoisomerase. Natural betulinic acid mainly exists in the bark of birch and other plants, but its content in birch bark is very low, only 0.025%, and industrial extraction is extremely difficult. Betulinic acid on the market is mainly synthesized from betulin as raw material. Betulin is a natural compound with high content in birch bark, and its content is about 15%-30%.
