Tauroursodeoxycholic acid (TUDCA) is an ambiphilic bile acid. It is the taurine conjugate form of ursodeoxycholic acid (UDCA). Humans are found to have trace amounts of TUDCA.

Tauroursodeoxycholic acid (TUDCA) is a compound originally approved to treat liver diseases — but recent research suggests it may have a broader application.

TUDCA is closely related to ursodeoxycholic acid (UDCA), with some structural differences. TUDCA is one of the compounds found in bile acid. Bile acid is made by the liver and stored in the gallbladder and helps with digestion.

Recently, TUDCA is being used and tested in a wide variety of therapeutic areas to explore its effectiveness. Amongst others, TUDCA has been studied for the way in which it may relieve the symptoms of inflammatory diseases.

This report contains market size and forecasts of T-UDCA in global, including the following market information:
