The tantalum-niobium metallurgical industry refers to the industry that manufactures tantalum-niobium metallurgical products from tantalum ore and niobium ore. Tantalum is a silvery high-density malleable solid at room temperature. It is a corrosion-resistant rare metal with high thermal and electrical conductivity. Niobium is a soft silvery malleable solid at room temperature and a corrosion-resistant rare metal with a high melting point. Tantalum and niobium are similar to each other in terms of physical properties and often coexist in the same mineral.
