Abstracts

Taps and dies are tools used to create screw threads, which is called threading. Many are cutting tools; others are forming tools. A tap is used to cut or form the female portion of the mating pair (e.g. a nut). A die is used to cut or form the male portion of the mating pair (e.g. a bolt). A tap cuts or forms a thread on the inside surface of a hole, creating a female surface which functions like a nut.
