Abstracts

Travel mobility scooters are defined as those that can be dismantled for easier transport. They usually break down into 4 or 5 parts that can easily be fitted into a car boot. They are the cheapest and most convenient if you have a car, but if you are travelling on public transport, a folding scooter is often the best option. All these scooters are under 45kg – we have many more that are slightly heavier, so if super-light is not a major criteria in your choice, do look at our whole range of travel mobility scooters and folding mobility scooters.
