## Abstracts

Pillows designed for travel are usually travel-sized, meaning that they are small or that they can be compressed, folded, or broken down in some way so that they take up a minimum of space. A classic type of travel pillow is an airplane pillow, which provides support to the head and neck for people who want to sleep on planes. Many airplane pillows are c or u-shaped, ensuring that the head and neck are not contorted while someone attempts to sleep in an airplane seat.
