Abstracts

A chandelier is defined as a lamp which is suspended from the ceiling either directly from a ceiling lamp outlet, or simply from a hook in the ceiling and then plugged into a common wall socket. Chandeliers use small, lower wattage bulbs that are usually shaped in the form of a candle flame, though these lamps are not limited to small bulbs. There are often three or more light bulbs in one chandelier, giving off from 100 to 400 watts of total light.
