Abstracts

Vacuum Skin Packaging (VSP) is an outstanding solution for extending the shelf life of perishable food products, including fresh and processed meats, poultry and seafood, ready-to-eat meals, fresh produce and cheese.

The shelf life of a VSP package is nearly double that of a traditional MAP package, and close to four times longer than a stretch-wrapped product. Everyone benefits from longer shelf life: retailers will reduce their shrink, consumers will reduce their food waste. The materials used to do VSP are PET, PE, PP, EPS etc.
