Abstracts

Vendor security and privacy assessment software helps companies manage cybersecurity and privacy risk assessment processes when identifying, evaluating, and regularly reevaluating their vendors, service providers, and other third parties. The purpose of this software is to help companies understand the privacy and cybersecurity risks associated with doing business with specific prospective and existing third parties. Vendor security and privacy assessments often include reviewing and scoring a vendor’s cybersecurity policies, documentation, results of recent audits, certifications, and legal agreements on how sensitive or personally identifying data will be accessed, used, processed, or sold as defined by data privacy laws such as the GDPR or CCPA.
