Abstracts

Weight loss stomach pump is a medical device that allows control over absorption of calories by the human body. It is a pump which connects externally to spill out entire stomach contents. Weight loss stomach pump enters the stomach with minimum efforts in order to port outside. This device is used to lose weight easily rather than following controlled diets, set of devices or surgeries to reduce belly fat. Patients are monitored on regular basis by the healthcare providers and guided by the diet advisors to reduce calories.
