Abstracts

Wheat germ oil is one such product, which is a great source of folic acid and vitamins B6 and E. This composition makes it a great anti-aging agent. Vitamin E is said to treat dry skin, eczema, and conditions that deteriorate the skin and accelerates aging. It has antioxidant properties, owing to which it is utilized in several anti-aging products like skin serums, creams, and lotions. The vitamin E present in wheat germ oil is converted to retinol by human body, which reduces the effects of aging. All these factors are anticipated to propel the product demand in near future.
