Abstracts

A wheelchair lift is a secure platform raised and lowered by a powerful motor. These lifts can be used to lift the chair alone or an occupied wheelchair to and from a vehicle or over stairs. Wheelchair lifts install on vans or, in homes or businesses where the lifts provide wheelchair access to upper floors with no elevators. Lifts conveniently move a wheelchair from the parking lot to the vehicle, or from the front porch on the house to the sidewalk or driveway. A wheelchair lift is significantly different from a stair lift with a permanently-attached seat which only accommodates the rider, not the passenger and wheelchair.
