Abstracts

Smart door locks are widely available, and allow users to open & close a door without keys. Smart door locks can provide people with a high level of safety that is not provided by typical locks and alarms. Smart door locks offer sophisticated “access control” features to any home or business. Proximity sensors like Bluetooth and NFC can enable a door to unlock whenever an authorized user’s smartphone approaches. Users can also remotely lock and unlock the door, or share access with any number of others, using mobile apps. Physical keypads provide a backup with many locks, but are no longer the main way to let yourself in.

This report contains market size and forecasts of WiFi Smart Lock in global, including the following market information:
