Abstracts

Wine Bottle sealing wax is used for just that: sealing bottles. It can be used to seal a variety of products. Some of the most popular products it is used for are Wine, Beer and Whiskey.

There are a few beneficial properties to bottle sealing wax. A few are listed below.

It is a strong flexible coating.

It opens easily. Unlike other bottle sealing methods, bottle sealing wax opens cleanly and easily without crumbling or cracking.

It is moisture resistant. Your product container might sit in a damp cellar for storage; the bottle sealing wax keeps all excess moisture out of the product.

It provides a secure seal. Most bottle sealing wax adheres to natural or synthetic corks to create a tight seal.

Creates a unique look. Unlike other bottle sealing methods, wax creates a unique look. You can choose from a variety of different wax colors (such as metallic, pearl, or even custom colors) to personalize your wine. Check out some of the many color options [here](#).
