Abstracts

X-Ray ionizer is certain to be the next generation of electrostatic charge removers, since it now eliminates all the problems conventional electrostatic removers have in terms of object, speed, environment and reliability.

Soft x-ray, or photon ionizers use a low power (less than 10 kiloelectron volts) x-ray source to produce intrinsically balanced positive and negative ionization. X-ray ionizers usually consist of a high voltage power supply and an x-ray (tube) source.
