Abstracts

Yam powder is prepared from yam. Yam is rich in vitamins and inorganic salts and trace elements indispensable to human body such as iodine, calcium, iron and phosphorus. It is a kind of food rich in nutrition and good for health. In yam, there is an important nutrient ingredient called diosgenin, which is a precursor of synthetic female hormones and has the effect of enhancing metabolism. The mucus and digestive enzymes of the polysaccharide protein contained in the fresh tubers of yam can prevent cardiovascular disease. Fat deposition helps digestion and absorption of the gastrointestinal tract.

This report contains market size and forecasts of Yam Powder in global, including the following market information:
