## Abstracts

Zirconium Oxide Flap Disc is a 3-dimensional abrasive product. They consist of abrasive flaps which surface filled with zirconium oxide and glued radially to a backing plate. As the product is used the abrasive wears down and new abrasive is exposed underneath. Flap discs offer fast stock removal and provide grinding, blending and finishing with one product. A zirconium flap disc consists of three components: backing plate, adhesive, and abrasive cloth flaps. Many companies manufacture zirconium flap discs, as these flap discs are more advantageous than grinding wheels.
