Abstracts

The Asia-Pacific Flue gas desulphurization (FGD) market is estimated to grow at a CAGR of 6.6% from 2014 to 2019. Geographically, the Asia-Pacific region comprises countries such as China, Japan, India, South Korea and Australia. China holds a larger share of 83.8% in the Asia-Pacific Flue gas desulphurization (FGD) market, due to rapid upsurge in industrialization leading to high energy requirements in the nation. China is followed by Japan and South Korea with shares of 6.8% and 2.0% respectively. The Asia-Pacific Flue gas desulphurization (FGD) market holds a high potential for growth in future due to a number of forces favoring this market. The major factors driving this market include coal-fired power plants, inflexible air pollution control regulations, environmental awareness among the power generation industry players and high grade by-products generated during flue-gas treatment process.

In this report, the Asia-Pacific Flue gas desulphurization (FGD) market is segmented on the basis of type and applications of FGD. The segmentation by type includes wet and dry FGD. Wet FGD contributes maximum share (89.8%) to the total Asia-Pacific Flue gas desulphurization (FGD) market.

The report has profiled the leading players of this market along with the recent developments of the companies. New contracts and agreements, mergers and acquisitions, new product launches and business expansions have been the key strategies adopted by the players to expand their FGD businesses in the region. The top players considered in this report are Alstom SA (Levallois-Perret, France), Marsulex

Environmental Technologies (Pennsylvania (U.S.), China Environment Ltd. (Long Yan City, Fujian Province), Thermax (Pune, India), and FLSMIDTH & CO. A/S (Copenhagen, Denmark).

Reasons to Buy the Report:

From an insight perspective, this research report has focused on various levels of analysis—industry analysis (industry trends, and PEST analysis), market share analysis of top players, and company profiles, which together comprise and discuss the basic views on the competitive landscape, usage patterns, emerging- and high-growth segments of the Asia-Pacific Flue gas desulphurization (FGD) market, high-growth countries and their respective regulatory policies, government initiatives, drivers, restraints, and opportunities.

The report will enrich both established firms as well as new entrants/smaller firms to gauge the pulse of the market, which in turn will help the firms in garnering a greater market, share. Firms purchasing the report could use any one or combination of the below mentioned five strategies (market penetration, product development/innovation, market development, market diversification, and competitive assessment) for strengthening their market share.

The report provides insights on the following pointers:

Product Analysis and development: Detailed insights on upcoming technologies, research and development activities, and new product launches in Asia-Pacific Flue gas desulphurization (FGD) market. Usage pattern/ penetration rate (in-depth trend analysis) of products (segment wise) and purchasing data

Market Development: Comprehensive information about lucrative emerging markets. The report analyzes the markets for Asia-Pacific Flue gas desulphurization (FGD) across geographies, exploit new distribution channels, and new clientele base & different pricing policies

Market Diversification: Exhaustive information about new products, untapped geographies, recent developments, and investments decisions in the Asia-Pacific Flue gas desulphurization (FGD) market. Detailed description regarding the related and unrelated diversification pertaining to this market

Competitive Assessment: In-depth assessment of market shares, company

share analysis of the key players. Development of business strategies and manufacturing capabilities of leading players enhance the bottom line of the companies in the Asia-Pacific Flue gas desulphurization (FGD) market.

Product/ Brand Perception Analysis: Comprehensive study of customers perception and behavior through our inbuilt social connect tool (digital marketing language) checking the virality and tonality of blogs
