Abstracts

The Asia-Pacific optical microscopy market is estimated to grow at a CAGR of 6% during the forecast period. The growth of the Asia-Pacific optical microscopy market is driven by factors such as its increasing application in the life sciences and material sciences applications. In the overall optical microscopy market, the inverted microscope and stereo microscope types are expected to be the highest market segment and lead the market from the demand side.

In this report, the Asia-Pacific optical microscopy market has been broadly classified into types such as the inverted microscopes, stereo microscopes, phase contrast microscopes, fluorescence microscopes, confocal microscopes, near-field microscopes, and others.

The report gives a detailed analysis of these microscope types, and their broad existing and emerging markets. The various application segments for the optical microscopes in the Asia-Pacific region are semiconductors, life sciences, material sciences, nanotechnology, and others.

There are a number of players in the Asia-Pacific region for the optical microscopy market, which makes it competitive. As of 2014, the Asia-Pacific optical microscopy market has top market players such as Hitachi High-technologies Ltd. (Japan), Jeol Ltd.

(Japan), Carl Zeiss (Germany), Nikon Corporation (Japan), Olympus Corporation (Japan), Keyence Corporation (Japan), FEI Company (U.S.), Vision Engineering (U.K.), Bruker Corporation (U.S.), Leica Microsystems (Germany), and others. Others include Hitachi High-technologies Ltd. (Japan) & Jeol Ltd. (Japan), where both account for a large market share.

Customization Options:

Along with the market data, you can also customize the MMM assessments that are in accordance to your company's specific needs. Customize to get comprehensive industry standards and deep-dive analysis of the following parameters:

Product Analysis:

- Usage pattern (in-depth trend analysis) of products (segment-wise)

- Product matrix, which gives a detailed comparison of the product portfolio of each company mapped at the country and sub-segment level

- End-user adoption rate analysis of the products (segment-wise and country-wise)

- Comprehensive coverage of product approvals, pipeline products, and product recalls

Data from the Manufacturing Firms:

- Fast turn-around analysis of manufacturing firms' responses to the recent market events and trends

- Various firms' opinions about different applications where optical microscopes could be used

- Qualitative inputs on the macro-economic indicators, mergers & acquisitions in each geography

Comparative Analysis:

Market data and key developments of the top companies

Shipment/Volume Data:

Tracking the value of components shipped annually in each geography

Trend analysis of Application:

Application matrix, which gives a detailed comparison of the application portfolio of each company, mapped in each geography
