Abstracts

Asia-Pacific refrigerants market is expected to grow at a CAGR of 6.0% between 2016 and 2021. Refrigerants are chemical compounds used in heat pumps and refrigeration cycles. In terms of volume, the fluorocarbon refrigerants segment dominated the Asia-Pacific refrigerants market. Increasing population and increasing demand of refrigerants in automobile and food industries, along with initiatives for new technologies and products are projected to make this region ideal for the refrigerant market to grow. The growing construction, automobile, and packaged food industries are fueling the demand for refrigerants in Asia-Pacific.
