Abstracts

The Asia-Pacific commercial aircraft batteries and accessories market was valued at \$47.8 million in 2014, and is expected to reach \$68.9 million by 2019, at a CAGR of 7.5% from 2014 to 2019.

The rising cost of aviation fuel has become an emerging concern for aviation companies, forcing them to look for alternatives to conventional fuel sources. Intense research is taking place to explore the use of electrical energy to operate lightweight aircraft. The focus on electrical energy as an efficient and eco-friendly alternative to conventional aviation fuel will boost the aviation batteries and accessories market in the long run.

In this report, the Asia-Pacific commercial aircraft batteries and accessories market has been classified into aircraft type, battery chemistry, and geography. The aircraft type segment is further categorized into Very Large Aircraft (VLA), Wide Body Aircraft (WB), Narrow Body Aircraft (NB), and Regional Jets (RJ), while the battery chemistry segment is classified into Nickel Cadmium, Lithium, and Others.

The report discusses key industry, market, and technology trends that influence the more electric aircraft market. The report tracks, analyzes, and projects the market size for major regions. It provides an insight into regional trends on spending, analyzes

market size by region, and also provides the data on the spending pattern by types.

Reasons to Buy the Report:

From an insight perspective, this research report has focused on various levels of analysis, market share analysis of top players, supply chain analysis, and company profiles, which together comprise and discuss the basic views on the competitive landscape, emerging- and high-growth segments of the commercial aircraft batteries and accessories market, high-growth regions and countries and their respective regulatory policies, government initiatives, drivers, restraints, and opportunities.

The report will enrich both established firms and new entrants/smaller firms to gauge the pulse of the market, which in turn will help the firms in garnering a greater market share. Firms purchasing the report could use any one or combination of the below mentioned five strategies (market penetration, product development/innovation, market development, market diversification, and competitive assessment) for strengthening their market share.

The report provides insights into the following pointers:

Market Penetration: Comprehensive information on battery chemistries offered by the top players in the Asia-Pacific commercial aircraft batteries and accessories market

Product Development/Innovation: Detailed insights into upcoming technologies, research and development activities, and new product launches in the Asia-Pacific commercial aircraft batteries and accessories market

Market Development: Comprehensive information about lucrative emerging markets. The report analyzes the markets for various technologies across geographies

Market Diversification: Exhaustive information about new products, untapped geographies, recent developments, and investments in the Asia-Pacific commercial aircraft batteries and accessories market

Competitive Assessment: In-depth assessment of market shares, strategies, products, and manufacturing capabilities of leading players in the Asia-Pacific

commercial aircraft batteries and accessories market
