Abstracts

Europe Big Data market is expected to grow at an estimated CAGR of 28.5% during the forecast period of 2013 to 2018. Europe Big Data market ecosystem such as France and U.K. is expected to be the leader where the organizations are adopting the big data concept quickly as compared to other European countries. The countries in Europe are swiftly adopting big data technologies such as Hadoop, cloud-based analytics, and scalable data storage. The execution of Big Data had also benefited European government in their administration and management process. The advantages of Big Data have also attracted other sectors such as oil and gas, utilities, and manufacturing to adopt it for their efficient workflow. This report provides a competitive benchmarking of leading players in the industry such as IBM, HP, Dell, Oracle, Teradata, and others in terms of their product offerings, key strategies and operational parameters. This report has profiled market segmentation by software types, hardware types, types of services and by verticals. The Europe Big Data market report aims in estimating the current size and the future growth potential of this market across the different solutions, applications, verticals, and regions.
