Abstracts

The objective of this report is to identify various applications, types, and usage patterns of optical microscopes across industries and to analyze the complete ecosystem of the optical microscopy market in Europe. The Europe optical microscopy market is estimated to register a CAGR of 3.7% during the forecast period. The growth of Europe optical microscopy market is driven by its increasing adaption in life sciences and material sciences application market. The inverted microscope and stereo microscope types are estimated to be the highest revenue generators and lead the market among all types of optical microscopes.

In this report, the Europe optical microscopy market has been broadly classified by type, such as inverted microscope, stereo microscope, phase contrast microscope, fluorescence microscope, confocal microscope, near field microscope, and others.

This report gives a detailed analysis of these microscope types, and their existing and emerging markets. The various application segments for the optical microscope in the Europe region are semiconductor, life sciences, material sciences, nanotechnology, and others.

There are several players in Europe region for optical microscopy market which makes it competitive one. Leading market players, such as Hitachi High-technologies Ltd.

(Japan), Jeol Ltd. (Japan), Carl Zeiss (Germany), Nikon Corporation (Japan), Olympus Corporation (Japan), Keyence Corporation (Japan), FEI Company (U.S.), Vision Engineering (U.K.), Bruker Corporation (U.S.), Leica Microsystems (Germany), and others. Out of these companies, Hitachi High-technologies Ltd. (Japan) & Jeol Ltd. (Japan) both account for a majority of the market share.

Customization Options:

Along with the market data, you can also customize the MMM assessments that are in accordance to your company's specific needs. Customize to get comprehensive industry standard and deep-dive analysis of the following parameters:

Product Analysis:

- Usage pattern (in-depth trend analysis) of products (segment-wise)

- Product matrix, which gives a detailed comparison of product portfolio of each company mapped at country and sub-segment level

- End-user adoption rate analysis of the products (segment-wise and country-wise)

- Comprehensive coverage of product approvals, pipeline products, and product recalls.

Data from Manufacturing Firms:

- Fast turn-around analysis of manufacturing firms' responses to recent market events and trends

- Various firms' opinions about different applications where optical microscopes can be used

- Qualitative inputs on macro-economic indicators, mergers & acquisitions in each geography.

Comparative Analysis:

- Market data and key developments of top companies

Shipment/Volume Data:

Tracking the value of components shipped annually in each geography

Trend analysis of Application:

Application matrix, which gives a detailed comparison of application portfolio of each company, mapped in each geography
