Abstracts

Liquid Crystal on Silicon (LCoS) is a display technology that finds applications in various industries. Currently, automotive, consumer electronics, medical, defense, and several other industries are using this technology in their products.

The LCoS market in Europe is witnessing growth on account of increasing applications and its suitability for different products. It offers ruggedness, better quality, and flexibility as well as excellent output.

The report segments the market on the basis of different types of products, applications, technology, design type, architecture, and geographies. It includes profile of various companies currently active in this market. In addition to the company profiles, the report provides a competitive landscape of the key market players. The CL covers the market share analysis, mergers and acquisitions, collaborations, partnerships, new product developments, and other growth strategies of the market players.

Companies covered in the report include 3M (U.S.), Canon Inc. (Japan), Sony Corporation (Japan), LG Electronics (South Korea), JVC Kenwood Corporation (Japan),

and others.

Customization Options:

Along with the market data, you can also customize the MMM assessments that are in accordance to your company's specific needs. Customize to get comprehensive industry standard and deep-dive analysis of the following parameters:

Product Analysis:

Usage pattern (in-depth trend analysis) of products (segment-wise)

Product matrix, which gives a detailed comparison of product portfolio of each company mapped at country and sub-segment level

End-user adoption rate analysis of the products (segment-wise and country-wise)

Comprehensive coverage of product approvals, pipeline products, and product recalls.

Data from Manufacturing Firms:

Fast turn-around analysis of responses of manufacturing firms regarding recent market events and trends

Opinions from various firms regarding the different applications where LCoS can be used

Qualitative inputs on macro-economic indicators and mergers & acquisitions in each geography

Comparative Analysis:

Market data and key developments of top companies

Shipment/Volume Data:

Tracking the value of components shipped annually in each geography

Trend analysis of Application:

Application matrix, which gives a detailed comparison of application portfolio of each company, mapped in each geography
