Abstracts

The purpose of this report is to cover the definition, description, and forecast of the Europe Mannequin-Based Simulation Market. It involves an in-depth analysis of the market segmentation, which comprises submarkets, types, and end-users. This report also provides a deep insight of the strategic analysis of key players in this market. In this report, the Europe mannequin-based simulation market is segmented on the basis of its types and end-users. This market by type is segmented into patient simulators, task trainers, ultrasound simulators, surgical simulators, endovascular simulators, dental simulators, and eye simulators. The end-users are military organizations, academic institutes, and hospitals.

Germany is the largest mannequin-based simulation market growing at a CAGR of 19.9% for the forecast period from 2014 to 2019, in Europe. Its largest share is attributed to the rising adoption of simulation technologies, increasing demand for minimally invasive treatment, and increasing focus on patient safety. This will improve the demand for mannequin-based simulation in these markets. However, the limited availability of funds is a major constraint.

The report also provides a detailed competitive landscaping of the companies operating in this market. Segment and country specific company shares, news & deals, Mergers and acquisitions, segment specific pipeline products, product approvals, and product recalls of the major companies have been detailed. The main companies operating in this market are CAE, Inc. (U.S.), Laerdal Medical AS (Norway), Gaumard Scientific

Company Inc. (U.S.), Limbs & Things Ltd. (U.K.), etc.
