Abstracts

The Latin America pressure monitoring market was valued at USD 334.2 million in 2014 and is expected to reach USD 463.4 million by 2020, at a CAGR of 5.6% from 2015 to 2020. Pressure monitoring devices are classified into blood pressure monitors, pulmonary pressure monitors, and intraocular pressure monitors, and intracranial pressure monitors. Along with the devices market, the accessories market of pressure monitoring is also estimated both in terms of value and volume. Pressure monitors are a part of sophisticated multi-parameter patient monitors. Technological advancements in the field of pressure monitoring and the growing use of pressure monitors in hospitals and clinics have contributed to the increasing demand of pressure monitoring devices.
