Abstracts

The Asia-Pacific Textile Market size is estimated at USD 391.20 billion in 2024, and is expected to reach USD 443.72 billion by 2029, growing at a CAGR of 2.55% during the forecast period (2024-2029).

Key Highlights

Increasing demand for clothing and home furnishing products in the Asia-Pacific region are the major growth factors.

The COVID-19 crisis caused considerable damage and hardship across the global garment industry, affecting brands, manufacturers, and workers in various multitudes. The pandemic has exposed acute vulnerabilities in garment supply chains and the impact that sourcing decisions have on supplier factories and their workers. With the bulk of global garment production in Asia, the region remains the frontline of the adverse effects rippling through the supply chain.

Asia-Pacific is both the largest and fastest-growing silk market. Due to the easy availability of raw silk, China leads the Asia-Pacific silk market, accounting for approximately 80% of the region's demand for silk. China is also the world's largest producer of raw silk and silk yarns, trailing India, Thailand, and Uzbekistan. The country is the world's leading textile exporter, accounting for roughly 40% of global textile and clothing exports. With over 20,000 enterprises. The Asia-Pacific silk market is expected to expand further as a result of the region's growing economy, rapid advances in sericulture technology, and increased use of silk in the textile industry.

Thailand is well-known throughout the world as one of the world's largest producers of

fabric, sportswear, children's wear, women's wear, and casualwear. Furthermore, the country's exquisite finishing, dyeing, and printing services make it one of the world's most popular textile outsourcing destinations. Thailand currently employs nearly one million people through its 4,500 textile and apparel manufacturers. Most of these manufacturers, based in and around Bangkok and eastern Thailand, produce everything from man-made fiber plants, spinning and weaving to dyeing and printing.

According to Bangladesh's Export Promotion Bureau (EPB), the country's home textile export basket includes bed linen, bed sheet and other bedroom textiles, bath linen, carpets and rugs, blankets, kitchen linen, curtains, cushions and cushion covers, and quilt covers. Home textiles earned USD 1.62 billion from exports in the recently concluded fiscal year 2021-22, representing year-on-year growth of 43.28%. It is worth noting that home textiles earned USD 1.13 billion in exports in the previous fiscal year.

With Asia accounting for the majority of global garment production, the region remains at the forefront of the negative effects reverberating through the supply chain. With the challenges comes a window of opportunity for new alliances and new thinking about the industry's future and, more importantly, how it can be reshaped for a more resilient, sustainable, and human-centered future. Domestic consumers have prompted businesses to reconsider their supply chains, and e-commerce and digitalization have benefited.

Asia Textile Market Trends

Increase in Consumer Spending in Fashion Accessories in Asia

The total consumer spending on clothing and footwear in Asia was forecast to continuously increase between 2024 and 2028 by a total of 27.8 billion U.S. dollars (+35.8 percent). After the eighth consecutive increasing year, fashion-related spending is estimated to reach 105.4 billion U.S. dollars and, therefore, a new peak in 2028.

The ongoing labor market recovery will also aid consumer confidence and, hence, spending. As demand for clothing from Asia (mainly China) grows, the importance of Europe and North America in this sector is declining. Sales of clothing products outside North America and Europe equaled sales in these regions in 2021, and they are expected to reach 55% of the total world sales of clothing products in 2025.

The Asia-Pacific region (Vietnam, the Philippines, Indonesia, Malaysia, Thailand, and Singapore) is highly attractive to the apparel sector, especially because it has a large

proportion of young people for whom digital solutions play an important and growing role.

Increase in Exports Boosting Revenue in Asia

In 2022, China was the top-ranked global clothing exporter, with a share of approximately 31.7 percent, followed by the European Union, Bangladesh, and Vietnam. In that year, China and the European Union were also the leading textile exporters in the world.

Many Asian economies have established garment, textiles, and footwear (GTF) manufacturing industries that contribute considerably to their GDPs and the global apparel market. China's export figures translate to almost 52.2% of the total textile export market in Asia.

The shift in consumer perception of affordable and comfortable clothing increases the demand for high-value fabrics, such as viscose, silk, and hemp. Blended varieties of fibers are also growing exponentially due to significant features of artificial and natural yarn, thus opening up new markets and growth opportunities in the coming years.

Polyester and cotton are widely used textile yarn products in the region. Changing consumption patterns, increasing population, disposable incomes, and the increasing demand for clothing and home furnishing products in the Asia-Pacific region are the major growth factors.

Also, the demand for home textiles is rising in the APAC region. Home textile includes products such as blankets, bedsheets, table cloths, cleaning and kitchen cloths, drapes, bed covers, sheers, wall carpets, sleeping bags, terry towels, mattresses, quilts, pillows, tapestry, etc., which are utilized in the interiors of homes, hotels, offices, etc.

Asia Textile Industry Overview

The Asia-Pacific textile market is highly competitive and fragmented. Some of the companies in the Asia-Pacific Textile industry are Shenzhou International Group, Weiqiao Textile, Texhong Textile Group, Arvind Ltd, and Bombay Dyeing and

Manufacturing Company Ltd. Numerous local companies are restricted to their locations, but with technological advancement, Internet and e-commerce penetration has driven the market even in the hard times. Further, integration of the market, followed by mergers, partnerships, and acquisitions, will help the companies to create a strong foothold in the market.

Contents

1 INTRODUCTION

- 1.1 Study Assumptions
- 1.2 Scope of the Study

2 RESEARCH METHODOLOGY

- 2.1 Analysis Method
- 2.2 Research Phases

3 EXECUTIVE SUMMARY

4 MARKET INSIGHTS AND DYNAMICS

- 4.1 Current Market Scenario
- 4.2 Market Dynamics
 - 4.2.1 Drivers
 - 4.2.1.1 Rising willingness to pay premium for high quality apparel
 - 4.2.1.2 Shifting inclination toward natural fiber-based textile garments
 - 4.2.2 Restraints
 - 4.2.2.1 Asia pacific trade limitations because of supply chain disruption
 - 4.2.3 Opportunities
 - 4.2.3.1 Growing influence of social media and e-commerce platform
- 4.3 Value Chain / Supply Chain Analysis
- 4.4 Porter's Five Forces Analysis
 - 4.4.1 Threat of New Entrants
 - 4.4.2 Bargaining Power of Buyers/Consumers
 - 4.4.3 Bargaining Power of Suppliers
 - 4.4.4 Threat of Substitute Products
 - 4.4.5 Intensity of Competitive Rivalry
- 4.5 Supply Chain/Value Chain Analysis
- 4.6 Technological Trends and Automation
- 4.7 Government Regulations and Initiatives
- 4.8 Insights into the E-commerce Market
- 4.9 Impact of COVID-19 on the Market

5 MARKET SEGMENTATION

5.1 Application

- 5.1.1 Clothing
- 5.1.2 Industrial and Technical
- 5.1.3 Household
- 5.1.4 Other Applications

5.2 Material

- 5.2.1 Cotton
- 5.2.2 Jute
- 5.2.3 Silk
- 5.2.4 Synthetics
- 5.2.5 Wool

5.3 Geography

- 5.3.1 China
- 5.3.2 India
- 5.3.3 Pakistan
- 5.3.4 Bangladesh
- 5.3.5 Australia
- 5.3.6 Rest of Asia-Pacific

6 COMPETITIVE LANDSCAPE

6.1 Market Concentration Overview

6.2 Company Profiles

- 6.2.1 Shenzhou International Group
- 6.2.2 Weiqiao Textile
- 6.2.3 Texhong Textile Group
- 6.2.4 Arvind Ltd
- 6.2.5 Bombay Dyeing and Manufacturing Company Ltd
- 6.2.6 Bombay Rayon Fashions Ltd
- 6.2.7 Fabindia Overseas Pvt Ltd
- 6.2.8 Raymond Ltd
- 6.2.9 Vardhman Textiles Ltd
- 6.2.10 Cotton Corporation Of India*

6.3 Other Companies
