Abstracts

The Chlorinated Polyethylene Market size is estimated at 577.28 kilotons in 2024, and is expected to reach 815.35 kilotons by 2029, growing at a CAGR of greater than 7% during the forecast period (2024-2029).

The chlorinated polyethylene market witnessed several hurdles and interruptions in terms of supply and demand during the COVID-19 pandemic. Owing to the logistical and supply chain issues combined with government restrictions, chlorinated polyethylene suppliers faced challenges in procuring raw materials for production, as well as labor issues. However, as the market activities started to restore with the worldwide recovery from the pandemic because of an increase in vaccinations combined with government strategies, the chlorinated polyethylene market started to get back to the previous market states.

The increasing demand for high-performance polyethylene products is projected to drive the growth of the chlorinated polyethylene market.

Fluctuations in raw materials prices like crude oil and the laying down of strict regulations regarding the use of polyethylene from various countries are expected to hinder the market's growth during the forecast period.

Nevertheless, research and development pertaining to the development of advanced and sustainable grades of chlorinated polyethylene are expected to offer lucrative opportunities to the market.

Asia-Pacific accounted for the highest market share and is also likely to dominate the

market during the forecast period.

Chlorinated Polyethylene Market Trends

Impact Modifier to Dominate the Market

Impact modifier stands to be the dominating application segment for the chlorinated polyethylene market owing to increasing global construction and reconstruction activities, coupled with the wide applicability of chlorinated polyethylene.

Huge demand for PVC siding, pipes, window profiles, doors, and fences is driving the growth of impact modifiers in this market, among others from the building & construction industry.

The growing use of CPE 135A in specialty polyvinyl chloride electrical conduits and highly filled compounds is witnessed owing to its superior ductility. Development in the global market segment of CPE 135A is majorly due to the increased use of the CPE 135A category in the application of impact modifiers.

The impact modifier is widely used in packaging applications owing to its ability to offer an ideal balance between crease-whitening resistance and clarity for packaging applications. A fast increment in the use of plastic packaging in different end-use enterprises is expected to drive the demand for impact modifiers. For instance, according to the Organisation for Economic Co-operation and Development (OECD), the global plastic use for packaging can grow up to 20.1% in volume by 2029 compared to 2022.

The growing incorporation of plastics across industries worldwide due to the requirement of improved weight and cost reductions is also expected to propel the demand for impact modifiers and, thus, ultimately, chlorinated polyethylene. For instance, according to Our World in Data, the global plastics production volume is expected to reach nearly 573.42 million tons in 2029 compared to 475.39 million tons in 2022.

All the factors above and drivers are expected to increase the impact modifier application segment's dominance in the market during the forecast period.

Asia-Pacific Region to Dominate the Market

Building and construction is the largest end-user industry for chlorinated polyethylene. Chlorinated polyethylene is extensively used in construction and building materials, such as thermal insulation materials, waterproofing membranes, pipe seals, flooring materials, etc., to provide them with weather resistance, chemical resistance, and heat resistance.

The Asia-Pacific region majorly dominates the chlorinated polyethylene market, as it has the world's busiest and largest building and construction industry. For instance, according to Seasia.co, Asia-Pacific has over 7,500 skyscrapers, which is more than 80% of the world's total number of skyscrapers.

Countries such as China, India, Japan, Indonesia, and South Korea, among others, are responsible for the large size of the region's building and construction industry.

Moreover, according to the United Nations Conference on Trade and Development (UNCTAD), the Asia-Pacific is projected to witness the highest growth in urban population, with an increase of 1,033 million more people residing in urban areas by 2050 compared to 2022. This will likely increase the construction volume of all kinds of buildings and infrastructure in the region. Hence, the dominance of the Asia-Pacific region over the chlorinated polyethylene market will be sustained during the forecast period.

Chlorinated polyethylene is also extensively used in the automotive industry due to its vast applications in automotive seals, door trims, protective covers, etc. Moreover, Asia-Pacific is the leading producer of automotives globally.

Hence, owing to the trends mentioned above and the data, the Asia-Pacific region is projected to dominate the chlorinated polyethylene market during the forecast period.

Chlorinated Polyethylene Industry Overview

The global chlorinated polyethylene market is fragmented in nature owing to the presence of numerous players with no significant market share. Some of the major players in the market (not in any particular order) include SHOWA DENKO K.K., Hangzhou Keli Chemical Co., Ltd., Shandong Novista Chemical Ltd., Dow, and Sundow

Polymers Co., Ltd., amongst others.

The market estimate (ME) sheet in Excel format

3 months of analyst support

Contents

1 INTRODUCTION

- 1.1 Study Assumptions
- 1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET DYNAMICS

- 4.1 Drivers
 - 4.1.1 Growing Demand for High Performance Polyethylene Products
- 4.2 Restraints
 - 4.2.1 Fluctuating Raw Material Prices
 - 4.2.2 Strict Regulations Regarding the Use of Polyethylene
- 4.3 Industry Value Chain Analysis
- 4.4 Porter's Five Forces Analysis
 - 4.4.1 Bargaining Power of Suppliers
 - 4.4.2 Bargaining Power of Buyers
 - 4.4.3 Threat of New Entrants
 - 4.4.4 Threat of Substitute Products
 - 4.4.5 Degree of Competition

5 MARKET SEGMENTATION (MARKET SIZE IN VOLUME)

- 5.1 Product
 - 5.1.1 CPE 135A
 - 5.1.2 CPE 135B
 - 5.1.3 Other Products
- 5.2 Application
 - 5.2.1 Impact Modifier
 - 5.2.2 Wire and Cable Jacketing
 - 5.2.3 Hose and Tubing
 - 5.2.4 Adhesives
 - 5.2.5 Infrared Absorption
 - 5.2.6 Other Applications

5.3 Geography

5.3.1 Asia-Pacific

5.3.1.1 China

5.3.1.2 India

5.3.1.3 Japan

5.3.1.4 South Korea

5.3.1.5 Rest of Asia-Pacific

5.3.2 North America

5.3.2.1 United States

5.3.2.2 Canada

5.3.2.3 Mexico

5.3.3 Europe

5.3.3.1 Germany

5.3.3.2 United Kingdom

5.3.3.3 France

5.3.3.4 Italy

5.3.3.5 Rest of Europe

5.3.4 South America

5.3.4.1 Brazil

5.3.4.2 Argentina

5.3.4.3 Rest of South America

5.3.5 Middle-East and Africa

5.3.5.1 Saudi Arabia

5.3.5.2 South Africa

5.3.5.3 Rest of Middle-East and Africa

6 COMPETITIVE LANDSCAPE

6.1 Mergers and Acquisitions, Joint Ventures, Collaborations, and Agreements

6.2 Market Share/Ranking Analysis**

6.3 Strategies Adopted by Leading Players

6.4 Company Profiles

6.4.1 Dow

6.4.2 Dycon Chemicals

6.4.3 Hangzhou Keli Chemical Co., Ltd.

6.4.4 Jiangsu Tianteng Chemical Industry Co., Ltd.

6.4.5 Aurora Plastics LLC

6.4.6 Shandong Gaoxin Chemical Co., Ltd.

6.4.7 Shandong Novista Chemicals Co.,Ltd (Novista Group)

6.4.8 Shandong Xiangsheng New Materials Technology Co.,Ltd.

6.4.9 Shandong Xuye New Materials Co., Ltd.

6.4.10 Resonac Holdings Corporation

6.4.11 Sundow Polymers Co., Ltd.

6.4.12 Weifang Yaxing Chemical Co., Ltd.

7 MARKET OPPORTUNITIES AND FUTURE TRENDS

7.1 Research and Development Pretaining to the Development of Advanced Grades
