Abstracts

The Kitchen Cabinets Market size is estimated at USD 75.66 billion in 2024, and is expected to reach USD 96.05 billion by 2029, growing at a CAGR of 4.89% during the forecast period (2024-2029).

The kitchen is seen to be the most important and focused area of a house's construction. Compared to conventional closed-door kitchens, open kitchen areas are more prevalent, and kitchens are evolving from being places for cooking to being social hubs within homes. The market for kitchen cabinets is being driven by a number of factors, including rising per capita income, changing lifestyles, and an increase in construction activity in all major global economies.

One of the main things affecting kitchen cabinet sales is the construction of residential structures. The growing need for effective storage that makes the most of limited spaces is also expected to fuel the product's sales. Product demand is predicted to be driven by consumers' growing need for efficient, space-saving storage that maximizes the use of tiny spaces. In the near future, customization, a response to the distinct demands of contemporary consumers, is anticipated to dominate the market.

Due to a number of technical advances, the kitchen cabinet sector is becoming more attractive and accessible to customers. The larger shelves that can support heavier goods are the product of the slide-glide technology. Drawers can now be used to store larger things, including pots, pans, dishware, and chopping blocks, as well as utensils, cutlery, and spices. Drawer-only base cabinetry is becoming increasingly popular in industrialized countries as a style in cabinetry. The global increase in contemporary infrastructure projects is anticipated to fuel demand for kitchen cabinets that are ready to install. However, the low demand in developing and underdeveloped nations,

primarily due to low disposable income and a slow rate of development, may restrict the market's total global expansion for ready-to-install kitchen cabinets.

Kitchen cabinets are typically made of a variety of materials, such as plastic, marble or concrete, stainless steel, and wood. The plan area is one of the most important components in designing a functional and useful kitchen space. Some important factors that determine what a home kitchen needs are size, versatility, and safety. The kitchen's layout and size are also crucial components. Appropriate design codes and ideal cabinet designs are prerequisites for a respectable kitchen design. Every client has a varied functional area and a different cabinet design. Cabinets might include pantries, shelves, cupboards, and storage spaces. There are a few different kinds of cabinets: semi-custom, stock/modular, custom face-frame, and frameless cabinetry.

Kitchen Cabinet Market Trends

Customized and Semi-Custom Kitchen Cabinets are Driving the Market in United States

The kitchen is frequently regarded as the most significant area in the house, and kitchen remodeling is one of the most popular home restoration projects, which raises the value of kitchen cabinets. According to a survey conducted by reputable US sources, most homeowners who modernized their kitchens chose custom or semi-custom cabinet designs. The demand for customized kitchen cabinets is rising in the area and supports the worldwide trend because they are more reasonably priced than standard kitchen cabinets.

Recessed door styles were the most popular among the various cabinet door styles. The future looks promising for industrial items and wooden components, which are essential to the production of cabinets, retail fixtures, and other wood-based products. It was discovered that paint is the most popular material for kitchen cabinets, followed by glass and wood. Due to homeowners' preference for larger kitchens, the US residential project markets have contributed to the rapid expansion of countertops in renovation models.

Growth in Residential Construction Fueling the Market

The construction of new homes and renovations of existing ones leave consumers spending more on furniture products like kitchen cabinets, which fuels market growth.

As a result, the housing market is one of the key indicators of the economy. In the years to come, growth is anticipated to be greatly aided by residential remodeling and renovations, which are becoming more common in industrialized nations like the US and Germany. As a result, opinions among consumers regarding different kinds of kitchen cabinets will change, and future growth is anticipated in the industry. In addition to single-family and multi-family housing development, the value of home improvements, including expansions, modifications, and significant replacements, is also included in this metric.

Kitchen Cabinet Industry Overview

The kitchen cabinet market is highly competitive, as many players are opting for different strategies to meet the diversifying needs of the consumer. As global players enter newer markets, they pose a threat to local players. This is anticipated to lead to the strengthening of the kitchen cabinet market in the form of collaborations and mergers. Some of the leading players in the kitchen cabinets market include Poggenpohl, JPD Kitchen Depot, Canyon Creek Cabinet Company, Leggett & Platt Incorporated, and Leicht Kuchen AG, among others. Manufacturers are aiming to improve the ease of use of furniture by making proper design alterations to suit customization. There are several opportunities in the affordable and rental kitchen cabinet sector. Design inventions and focus on customer experience are the other key areas with significant potential for participants in the kitchen cabinet market.

Contents

1 INTRODUCTION

- 1.1 Study Assumptions and Market Definition
- 1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET INSIGHTS AND DYNAMICS

- 4.1 Market Overview
- 4.2 Market Drivers
 - 4.2.1 Increase in Residential Construction Projects is Driving the Market
 - 4.2.2 Growth in Innovation and Home Improvement Activities
- 4.3 Market Restraints
 - 4.3.1 Variable Raw Material Costs is a Challenging Factor Impacting the Kitchen Cabinet Market
 - 4.3.2 Difficult to Provide Training to Employees & Retain Them
- 4.4 Market Opportunities
 - 4.4.1 Ready To Assemble Kitchen Cabinet Market Boost the Demand in Future
 - 4.4.1.1 Innovative Technological Advancements Transforming the Kitchen Cabinets Market
- 4.5 Industry Value Chain/Supply Chain Analysis
- 4.6 Industry Attractiveness - Porter's Five Forces Analysis
 - 4.6.1 Bargaining Power of Suppliers
 - 4.6.2 Bargaining Power of Buyers/Consumers
 - 4.6.3 Threat of New Entrants
 - 4.6.4 Threat of Substitute Products
 - 4.6.5 Intensity of Competitive Rivalry
- 4.7 Insights Into Latest Trends, Recent Developments, And Innovations In The Market
- 4.8 Consumer Behavior Analysis and Buying Preferences
- 4.9 Impact of COVID-19 on the Market

5 MARKET SEGMENTATION

- 5.1 By Type

- 5.1.1 Ready-to-assemble (RTA) Kitchen Cabinets
- 5.1.2 Stock Kitchen Cabinets
- 5.1.3 Semi-custom Kitchen Cabinets
- 5.1.4 Custom Kitchen Cabinets
- 5.2 By Raw Material
 - 5.2.1 Wood
 - 5.2.2 Metal
 - 5.2.3 Other Raw Materials (acrylic, laminate, plywood, etc)
- 5.3 By End User
 - 5.3.1 Residential
 - 5.3.2 Commercial
- 5.4 By Distribution Channel
 - 5.4.1 Offline
 - 5.4.2 Online
- 5.5 By Geography
 - 5.5.1 North America
 - 5.5.1.1 United States
 - 5.5.1.2 Canada
 - 5.5.1.3 Mexico
 - 5.5.2 Europe
 - 5.5.2.1 Germany
 - 5.5.2.2 United Kingdom
 - 5.5.2.3 France
 - 5.5.2.4 Italy
 - 5.5.2.5 Spain
 - 5.5.2.6 Rest of Europe
 - 5.5.3 Asia-Pacific
 - 5.5.3.1 India
 - 5.5.3.2 China
 - 5.5.3.3 Japan
 - 5.5.3.4 Rest of Asia-Pacific
 - 5.5.4 South America
 - 5.5.4.1 Brazil
 - 5.5.4.2 Argentina
 - 5.5.4.3 Rest of South America
 - 5.5.5 Middle East & Africa
 - 5.5.5.1 United Arab Emirates
 - 5.5.5.2 Saudi Arabia
 - 5.5.5.3 Rest of the Middle East & Africa

6 COMPETITIVE LANDSCAPE

6.1 Market Concentration Overview

6.2 Company Profiles

6.2.1 Poggenpohl

6.2.2 JPD Kitchen Depot
