Abstracts

The Spacecraft Market size is estimated at USD 6.89 billion in 2024, and is expected to reach USD 8.68 billion by 2029, growing at a CAGR of 4.74% during the forecast period (2024-2029).

Various countries globally are increasing their investments in space exploration and commercial and military applications, which is expected to continue driving the growth of the spacecraft market during the forecast period. Various players in the market in countries like China, the United States, India, and major European countries are collaborating on developing advanced space projects, which are expected to generate demand for new space vehicles over the coming years.

Key Highlights

The rapid increase in funding for space entrepreneurs is due to governments spending heavily on establishing a strong footing for the growth of the space economy. The surge in funding is mainly due to geopolitical uncertainties, given that government agencies are using satellite imagery and data for everything from analyzing weather patterns or agriculture to movements at global borders.

The development of advanced technologies has led to the miniaturization of spacecraft components and a reduction in overall manufacturing costs, which may support future market growth. Components that can perform the same functions while taking up less space and mass are needed. Manufacturers may explore microaturization techniques such as microelectromechanical systems and nanotechnology. In addition, manufacturers can improve the efficiency of solar panels by using advanced photovoltaic materials, optimizing cell design, and implementing tracking mechanisms to

maximize exposure to sunlight.

Spacecraft Market Trends

Unmanned Spacecraft to Dominate Market Share During the Forecast Period

The unmanned spacecraft segment is projected to continue its dominance during the forecast period. The growth is attributed to the increasing expenditure on the space sector and increasing satellite launch programs from space agencies across the globe. The segment includes revenues from the launch of satellites, cargo transportation spacecraft, and spacecraft to deploy land rovers for planetary exploration missions.

Over the past few years, satellite launches have increased to support various applications. Satellite launches are expected to grow in the coming years to support multiple applications, including military, commercial (like telecommunication), space exploration, etc. For instance,

The US Space Development Agency, established in 2019, announced its plan to launch nearly 1,000 satellites in orbit by FY 2026.

In December 2022, Space Cargo Unlimited, a Luxembourg-based company, signed a contract with ThalesAleniaSpace to develop a reusable unmanned spacecraft that will be used for production in orbit. Under the agreement, the REV1 spacecraft will make its maiden flight in 2025. The spacecraft, the size of a compact car, can carry up to 1,000 kg of payload.

Thus, the growing expenditure on the space sector and the development of robotic spacecraft are expected to drive the growth of the market during the forecast period.

North America to Dominate the Market During the Forecast Period

North America is expected to dominate the spacecraft market during the forecast period. This is majorly due to rising expenditure on the space sector, increasing number of satellite launches for commercial and defense applications, and growing space exploration activities from NASA and SpaceX.

In 2022, the US Government spent approximately USD 62 billion on its space programs,

making it the country with the highest space expenditure in the world.

In 2022, there were a total of 186 orbital launches taking place, and the United States topped the list with 87 launches. Out of the total launches, 61 were performed by SpaceX. The company carried out 60 launches of the Falcon 9 rocket and one launch of the Falcon Heavy rocket.

In addition, Canada is increasing its focus on enhancing space capabilities and designing and developing advanced manned and unmanned spacecraft for various missions.

The Canadian Space Agency (CSA) released its 2022-23 Departmental Plan, which plans to spend USD 388.3 million for its upcoming 2022-23 fiscal year. For instance, in April 2023, Canada proposed to develop a robotic lunar rover for Artemis. The Canadian government announced its intent to spend USD 1.2 billion million for thirteen years to create a 'lunar utility vehicle' that supports human exploration of the moon. Developments such as these are projected to drive the growth of the spacecraft market in North America in the coming years.

Spacecraft Industry Overview

The spacecraft market is fragmented, with many players. The prominent players are Boeing Company, Airbus SE, Lockheed Martin Corporation, Space Exploration Technologies Corp., and Sierra Nevada Corporation.

Strategic collaborations and partnerships between market players are projected to drive the technology transfer between companies in the future. For instance, NASA's commercial crew program is a collaboration between key players in the market, including SpaceX, Boeing, and NASA, to fly astronauts to the International Space Station. Furthermore, due to the high growth opportunities in the space sector, many new startups and companies have been venturing into the industry through satellite manufacturing programs in the commercial sector and manned and unmanned systems development programs. This is increasing the competition in the market for existing players.

Contents

1 INTRODUCTION

- 1.1 Study Assumptions
- 1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET DYNAMICS

- 4.1 Market Overview
- 4.2 Market Drivers
- 4.3 Market Restraints
- 4.4 Industry Attractiveness - Porter's Five Forces Analysis
 - 4.4.1 Bargaining Power of Buyers/Consumers
 - 4.4.2 Bargaining Power of Suppliers
 - 4.4.3 Threat of New Entrants
 - 4.4.4 Threat of Substitute Products
 - 4.4.5 Intensity of Competitive Rivalry

5 MARKET SEGMENTATION

- 5.1 By Type
 - 5.1.1 Manned Spacecraft
 - 5.1.2 Unmanned Spacecraft
- 5.2 By Geography
 - 5.2.1 North America
 - 5.2.1.1 United States
 - 5.2.1.2 Canada
 - 5.2.2 Europe
 - 5.2.2.1 United Kingdom
 - 5.2.2.2 Germany
 - 5.2.2.3 France
 - 5.2.2.4 Russia
 - 5.2.2.5 Rest of Europe
 - 5.2.3 Asia-Pacific

- 5.2.3.1 China
- 5.2.3.2 India
- 5.2.3.3 Japan
- 5.2.3.4 South Korea
- 5.2.3.5 Rest of Asia-Pacific
- 5.2.4 Latin America
 - 5.2.4.1 Brazil
 - 5.2.4.2 Rest of Latin America
- 5.2.5 Middle East and Africa
 - 5.2.5.1 Saudi Arabia
 - 5.2.5.2 Turkey
 - 5.2.5.3 Egypt
 - 5.2.5.4 Rest of Middle East and Africa

6 COMPETITIVE LANDSCAPE

- 6.1 Vendor Market Share
- 6.2 Company Profiles
 - 6.2.1 The Boeing Company
 - 6.2.2 Airbus SE
 - 6.2.3 Lockheed Martin Corporation
 - 6.2.4 Space Exploration Technologies Corp.
 - 6.2.5 Sierra Nevada Corporation
 - 6.2.6 QinetiQ Group
 - 6.2.7 Northrop Grumman Corporation
 - 6.2.8 Berlin Space Technologies GmbH
 - 6.2.9 OHB SE
 - 6.2.10 Blue Origin LLC
 - 6.2.11 Maxar Technologies Inc.
 - 6.2.12 Mitsubishi Electric Corporation

7 MARKET OPPORTUNITIES AND FUTURE TRENDS

I would like to order

Product name: Spacecraft - Market Share Analysis, Industry Trends & Statistics, Growth Forecasts (2024 - 2029)

Product link: <https://marketpublishers.com/r/SDE5CA73C7F5EN.html>

Price: US\$ 4,750.00 (Single User License / Electronic Delivery)
