Abstracts

The Waffle Maker Market size is estimated at USD 234 million in 2024, and is expected to reach USD 389 million by 2029, growing at a CAGR of greater than 5.5% during the forecast period (2024-2029).

The market for compact kitchen appliances includes the waffle maker. A growing combination of innovation and quality is driving the growth of large categories of waffle makers. Due to increased disposable money and changing global lifestyles, waffle makers are predicted to develop quickly. Additionally, consumers from a wide range of socioeconomic backgrounds, as well as those from Western nations like the US and Canada, view waffles as a staple breakfast dish. Additionally, the global market growth for waffle makers has crystallized due to the increasing consolidation of value-added features, which is encouraging the supply of higher-quality products to consumers.

Waffle makers are becoming more and more popular among consumers for family meals because of their simple cooking cycle, low running costs, high efficiency, high productivity, less counter space taken up, and simplicity of cleaning and sanitizing. It's also anticipated that growing additional income on hand for each person combined with a smart item collection would boost interest in the waffle producer's market. Moreover, the main problems are low energy consumption and increased health risks. To address these issues, a lot of global businesses are concentrating on developing new waffle-making products.

Along with their sturdy features—like temperature controls and timers—and compact design for industrial kitchens, these waffle makers also save energy. Additionally, throughout the forecast period, the growing tendency of developing economies to shift to Western meals is anticipated to fuel the market for waffle producers' growth at a rapid

pace. On the other hand, some of the primary industrial barriers that are anticipated to affect the worldwide waffle maker market are lengthy pre-heat periods, lengthier bake times, and daily maintenance.

Waffle Maker Market Trends

Rising Consumer Spending Power is Driving the Market

The current lifestyle of consumers necessitates that each appliance not only meets their requirements but also contributes to their daily lives. The COVID-19 pandemic has led to an increase in the number of people who are responsible for cooking and cleaning their own homes. Despite the end of the lockdown, this trend has continued, suggesting that there is a continuing need for home appliances and that the sector has experienced a remarkable expansion in recent years. The global waffle maker market is primarily driven by the increasing urban population and the increasing demand for on-demand snacks, especially in developed and developing economies. Additionally, the business drivers driving the development of global cracker exchange portions include the acceleration of urbanization, the increase in disposable income, and the commencement of settled lifestyles. As urbanization and premiumization become increasingly prominent, brands are investing heavily in product innovation. In the past, market penetration was a primary factor in increasing market share. However, this is gradually becoming less of an issue. Industry players have come to understand that while it is important to achieve scale, it is also necessary to redesign products to meet local consumer requirements. This can involve personalizing the design or features of the product, as well as incorporating consumer insights into the product.

Rise In The Demand For Belgian Waffle Maker

Due to its ability to create thick, deep waffles, the Belgian waffle maker is anticipated to hold the biggest market share in the world. While most other versions only produce one or two waffles at a time, this one can make up to three at once. Moreover, the Belgian waffle maker's wider cooking surfaces allow it to switch between baking and steaming at the same time, unlike its competitors. The market share of waffle makers worldwide is dominated by the commercial segment. Although they are more expensive than residential ones, commercial waffle makers are frequently used in restaurant or hotel kitchens to prepare medium-to-large amounts of waffles. The most well-known brands in this industry are Cuisinart, Black + Decker, and Waring Pro.

Waffle iron sales have increased as a result of waffles' growing appeal. Due to its ability to create thick, deep waffles, the Belgian waffle maker is anticipated to hold the biggest market share in the world. Waffle Maker Industry Overview

The waffle maker market tends to be competitive, as the presence of many players characterizes it. Players are attempting to distinguish their products based on features such as heat control level, end-of-baking buzzer, and even heat distribution. Several companies are attempting to develop waffle makers with improved features to minimize bake cycle time and boost productivity. Players are now attempting to follow safety and quality requirements. Some of the most important players in the waffle maker market are Hamilton Beach, Krampouz, Cuisinart, Krups, and Breville.

Contents

1 INTRODUCTION

1.1 Study Assumptions & Market Definition

1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET DYNAMICS

4.1 Market Drivers

4.1.1 Growing popularity of waffles as a breakfast option all over the world

4.1.2 As consumer spending power and knowledge of the food and service industries increases, the waffle maker market is expanding

4.2 Market Restraints

4.2.1 Economic recession may affect customers purchasing ability

4.3 Market Opportunities

4.3.1 Growing trends of mini waffle makers on social sites will create a lucrative opportunity for residential waffle makers market

4.3.2 Continuous changes in eating habits in developed countries

4.4 Porter's Five Forces Analysis

4.4.1 Threat of New Entrants

4.4.2 Bargaining Power of Buyers/Consumers

4.4.3 Bargaining Power of Suppliers

4.4.4 Threat of Substitute Products

4.4.5 Intensity of Competitive Rivalry

4.5 Industry Value Chain Analysis

4.6 Insights into technological advancements in the industry

4.7 Insights on Recent Developments (new product launches, investments, partnerships, JVs, etc.) in the Market

4.8 Impact of COVID-19 on the market

5 MARKET SEGMENTATION

5.1 By Type

5.1.1 Stove-Top Waffle Irons

- 5.1.2 Classic Round Waffle Makers
- 5.1.3 Square Belgian Waffle Makers
- 5.1.4 Round
- 5.2 By End-User
 - 5.2.1 Residential
 - 5.2.2 Commercial
- 5.3 By Distribution Channel
 - 5.3.1 Supermarkets/Hypermarkets
 - 5.3.2 Specialty Stores
 - 5.3.3 Multi-Branded Stores
 - 5.3.4 Online
 - 5.3.5 Others
- 5.4 By Geography
 - 5.4.1 North America
 - 5.4.2 Middle East and Africa
 - 5.4.3 Europe
 - 5.4.4 Asia-Pacific
 - 5.4.5 South America

6 COMPETITIVE LANDSCAPE

- 6.1 Market Concentration Overview
- 6.2 Company Profiles
 - 6.2.1 Hamilton Beach
 - 6.2.2 Krampouz
 - 6.2.3 Cuisinart
 - 6.2.4 Krups
 - 6.2.5 Conair
 - 6.2.6 Breville
 - 6.2.7 Proctor Silex
 - 6.2.8 All-Clad
 - 6.2.9 Waring
 - 6.2.10 Empower Brands, LLC.
 - 6.2.11 Star Manufacturing International
 - 6.2.12 Dash*
