Abstracts

Innovative Therapies for treating diseases are being sought after with fresh vigor as new targets , approaches and biology is discovered. One field which is poised to bring a paradigm change in the way diseases are treated in the next decades is the Stem cell therapy/Regenerative Medicine space. The number of companies and products in the clinic have reached a critical mass warranting a close watch for those interested in keeping pace with the development of new medicines. The Regenerative medicine Universe is large and new companies are being added to it rapidly. As a result we have used some filters to select a few names for a detailed coverage in our Outlook this year.

Key Criteria for Our Selection are:-

Uniqueness of the Technology platform and the ability to scale up commercially in case of positive outcome of products in the pipeline

Pipeline and clinical data analysis

Marketed product and commercial tie up. Robustness of the Management, financial and business model.
