Date: August 2013

Pages: 3

Price: US\$ 140.00 (Single User License)

ID: I63B7D8A1E7EN

Abstracts

Positive interim Overall Survival analysis data from the PhII, RECAP trial of Ruxolitinib (L – JAKAFI for MF, oral JAK 1/2 inhibitor, PhII/III in PV/ET, partnered with Novartis for Ex-US rights) in combination with capecitabine in recurrent or treatment-refractory metastatic pancreatic cancer pts is a pleasant surprise. The hazard ratio for overall survival in the intent-to-treat (ITT) population was 0.79, and in a pre-specified subgroup analysis (pts identified prospectively as most likely to benefit from JAK pathway inhibition, 50% of the enrolled population), the HR for OS was 0.47 (one-sided $p=0.005$). With an ‘Orphan drug’ status for this indication and no approved drug for metastatic pancreatic cancer, label expansion could make. For more details, please read our report released on 21st Aug., 2013 on INCYTE, titled “JAKAFI’s Label Expansion in Ref. Metastatic Pancreatic Cancer = Multi-Billion Potential!”
