## **Abstracts**

Non Destructive Testing (NDT) is viewed as an essential need in commercial ventures, for example, in aviation industry, oil and gas industry, petroleum industry, and in construction sector. Developments in the NDT equipment market have expanded economically after the presentation of cutting edge X-ray equipment, for example, micro focus X-ray apparatuses, integrated X-ray tubes, glass X-ray tubes with window, radiation protected X-ray tools, etc.

Over the past few years, demand for Non Destructive Testing (NDT) services has expanded rapidly. As the US economy has recovered from the depths of the recession and as a result of it corporate profit margins have expanded and fueled capital expenditure. NDT sector will get future boost from the growing technological innovation and as a result NDT services will become more cost effective and efficient for end users.

Additionally, the forecast period offers huge potential growth for technologies such as computed tomography, phased array ultrasonic testing, and data management tools as these techniques are more efficient in terms of deriving accurate results.

This report provides qualitative and quantitative information about the global NDT market. It identifies the market application gaps, emerging technologies, the need for new product launches, and high potential geographic regions and countries. It also provides a segmentation of the market, tracking the market size, market share, revenue projections, and financial portfolio, covering a broad spectrum of the different methods,

end-user, applications, and techniques of NDT industry.

#### Who Should Buy this Report?

Aerospace & Defense Industry

Automotive Industry

Oil & Gas Industry

Power Plants

NDT Equipment Manufacturers

Original Equipment Manufacturers (OEMs)

Software Solution Providers

Component Suppliers

Turbine Manufacturers

Ship Hull Manufacturers etc.

Note: We will deliver this report in 7 working days after receiving order.
