## Abstracts

Six years ago, OLED lighting was first being proposed as a serious commercial product. Back then, 2014 was projected as the year when OLED lighting would first make its impact felt on general illumination. It didn't happen. OLED lighting has been available for four years now, but with few signs of its moving beyond the luxury and specialist lighting sector. Also, the disappearance of GE from this space is another reason to treat OLED lighting with a little less respect than it once had.

So is it time to wave goodbye to OLED lighting as a large-scale business opportunity and label it "niche only?" The case can be made. But then again some large lighting suppliers remain bullish on this technology and appear to mean what they say.

Also, the fate of OLED lighting remains of importance well beyond the lighting sector. Because OLED consist of large panels, their success or failure has major implications for both the OLED materials sector and the OLED market itself. Even a modest success for OLED lighting could quickly make it the largest segment of the OLED business; which would completely change the market orientation of the OLED market from one that is currently oriented towards small mobile displays.

In this complex market environment, NanoMarkets believes that it is time for a detailed and honest assessment of both the current value proposition and future revenue timeframes for OLED lighting. This is the objective of this report, which includes eight-year (volume and value) projections of OLED lighting in all the major market sectors along with an assessment of how OLED lighting can effectively compete with LEDs and CFLs in those segments. In addition, this report analyzes the core strategies of leading players in the OLED lighting space, including their plans for building manufacturing capacity for OLED lighting.

## Contents

### **EXECUTIVE SUMMARY**

Objectives and scope of this report  
Methodology and information sources  
Plan of report  
Major changes from the previous report  
Will OLED lighting ever be more than a luxury niche?  
Who will shape the future of the OLED lighting Industry?  
Geographies: Thoughts on national and regional OLED lighting markets  
Opportunities for OLED lighting start-ups  
Implications for OLED material companies  
Summary of eight-year forecasts of OLED lighting markets

### **CHAPTER ONE: INTRODUCTION**

Global presence of the OLED lighting industry  
Commercial application trends  
Performance comparison: Key parameters  
Favorable factors for the industry  
Key Issues faced by the industry  
Trends in OLED material deposition techniques  
Ways to achieve cost reduction targets  
Material and process improvement timeline  
Current production facility of key OLED lighting players  
Status of commercial availability of OLED lighting  
Companies involved and major investments  
OLED lighting industry: Possible market scenarios

### **CHAPTER TWO: MANUFACTURING, MATERIALS AND PERFORMANCE TRENDS SHAPING OLED LIGHTING COMMERCIALIZATION**

Key performance factors impacting the success of OLED lighting  
OLED light performance: current status and future targets  
OLED light performance: What can be expected  
Lifetime trends: in need of a substantial enhancement  
Key efficacy issues and probable solutions  
Bigger OLED panels: Key developments

Migration toward large panels: a necessary development  
Large sized panels: Final verdict  
Luminance trends: Key strategies for improvement  
Color warmth: Not a major problem  
OLED light performance: Impact on addressable market  
Flexible (Curved) OLED  
Flexible OLED panels: The reality  
The question of flexible OLEDs in automobiles  
Practical manufacturing issues requiring industry's attention  
Manufacturing factors shaping OLED lighting industry  
Cost reduction Initiative: Choice of deposition process  
Solution processing process: Key developments  
Encapsulation: A major technical hurdle to fabrication  
Choice of materials: Organic stack components  
Choice of materials: Substrates  
Choice of materials: Light extraction materials  
OLED Production Yields: Key developments  
OLED lighting manufacturing capacity estimation  
Manufacturing capacity expansion Plans: Key players  
European panel makers: Lagging behind Asian counterparts  
Manufacturing approach: Current expectations  
Manufacturing approach: What can be expected  
Manufacturing cost trends  
Cost structure: Comparison and key reduction drivers  
OLED lighting commercialization catalyst  
Key points made in this chapter

### **CHAPTER THREE: ADDRESSABLE MARKETS FOR OLED LIGHTING - ACTUAL AND POTENTIAL**

Status of OLED lighting  
Forecasting assumptions  
Key consumer markets: A geographic analysis  
Asia at the forefront of commercialization  
European R&D efforts to enhance the prospects for OLED lighting  
Share by country of OLED lighting consumption  
OLED luminaire trends: Design, cost and other factors  
Designer kits and samples: Market evolution  
Trends in designer kits and samples

Eight-year forecast of designer kits and samples  
Office lighting: A killer application?  
Eight-year forecast of office and commercial lighting applications  
Potential use of OLEDs in residential lighting  
Eight-year forecast of residential lighting applications  
Scope of OLEDs in outdoor (non-automotive) lighting  
Encapsulation issues in outdoor lighting  
Eight-year forecast of outdoor lighting applications  
Scope of OLEDs in outdoor (non-automotive) lighting  
Promise of OLED lighting for cars and other vehicles  
Potential hurdles to OLED in external automobile lighting  
Scope of OLED lighting in internal transportation lighting  
Eight-year forecast of automotive lighting applications  
Evaluation of OLED lighting in large-scale custom installations  
Eight-year forecast of customized large-scale custom installations  
Summary of eight-year forecasts of OLED lighting  
Key points made in this chapter

## **LIST OF FORECAST EXHIBITS**

Summary of eight-year forecasts of OLED lighting markets  
Forecasting assumptions  
Eight-year forecast of designer kits and samples  
Eight-year forecast of office and commercial lighting applications  
Eight-year forecast of residential lighting applications  
Eight-year forecast of outdoor lighting applications  
Share by country of OLED lighting consumption  
Eight-year forecast of automotive lighting applications  
Eight-year forecast of customized large-scale custom installations  
Summary of eight-year forecasts of OLED lighting

## I would like to order

Product name: OLED Lighting Markets-2014

Product link: <https://marketpublishers.com/r/OD7612F23CFEN.html>

Price: US\$ 2,495.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

[info@marketpublishers.com](mailto:info@marketpublishers.com)

## Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/OD7612F23CFEN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name:  
Last name:  
Email:  
Company:  
Address:  
City:  
Zip code:  
Country:  
Tel:  
Fax:
