

Radiation Detection In Medical and Healthcare Markets, 2014-2021

<https://marketpublishers.com/r/R9AF674DE14EN.html>

Date: December 2014

Pages: 0

Price: US\$ 1,995.00 (Single User License)

ID: R9AF674DE14EN

Abstracts

Medical/healthcare is an established end-market for radiation detection equipment in many applications, and continues to drive improvements in and demand for radiology diagnostic systems. Radiography is one of the most important aspects of non-destructive testing (NDT), and is used in a wide variety of medical applications. The market for detectors has benefited from advancements in the science of radiology and from better understanding of device and diagnostic systems by medical professionals.

Despite some recent negative trends from reimbursement factors to macroeconomically sluggish growth in the U.S. and Europe, NanoMarkets remains encouraged by other positive trends. Radiotherapy procedures are on the rise; super-specialized hospitals in developed nations are building financial and resource infrastructure for radiation-induced treatments, particularly for cancer. Gamma scintillation and X-ray detectors are priority areas of growth. In developing economies, improvements in medicine and an aging population also are trends seen as favorable to radiation detection in a medical/healthcare context.

In this report, we explore the revenue potential for radiation detection in the two major application areas for medical and healthcare contexts: X-ray radiation detection and gamma radiation detection. We also analyze the products and marketing strategies of the leading suppliers of radiation detection equipment in the markets covered. This report includes granular eight-year forecasts (volume and value) broken out by device types and world region.

NanoMarkets believes that business development executives and product management professionals, investors, entrepreneurs involved with radiation detection equipment - especially those with an eye toward medical/healthcare contexts - will benefit from the

comprehensive analysis of radiation detection trends and technologies within this report.

Contents

CHAPTER ONE: INTRODUCTION

- 1.11 Types of Radiation Detection Systems and Technologies
- 1.12 New Opportunities for Radiation Detection Equipment in Medical/Healthcare
- 1.13 Technology and the Drive for New and Better Materials
- 1.14 Opportunities for Electronics and Software
- 1.15 Medical Laboratories: An Important Niche
- 1.16 Companies to Watch in the Radiation Detection Business for Medical/Healthcare
- 1.2 Objective and Scope of this Report
- 1.3 Methodology of this Report
- 1.4 Market Forecasting Methodology
- 1.5 Plan of this Report

CHAPTER TWO: MARKET FOR MEDICAL X-RAY DETECTION

- 3.1 Radiography
- 3.2 Densitometry
 - 3.21 Dual-energy X-ray absorptiometry (DEXA)
 - 3.211 New developments
 - 3.2 Computed Tomography (CT)
 - 3.21 Market demand
 - 3.22 Detectors in CT
 - 3.23 Trends in multiple slicing and detection
 - 3.231 Radiation Dose Drivers in CT
 - 3.232 Opportunities in Volumetric CT
- 3.3 Medical X-Ray Radiology
 - 3.31 Conventional radiology
 - 3.32 Technical Trends
 - 3.33 Computed radiography (CR)
 - 3.34 Digitization
 - 3.341 Drivers and Challenges for DR enhancements
 - 3.35 Digital Mammography
- 3.4 Types of Radiation Detectors Used in Medical X-Ray Detection
- 3.5 Main Suppliers of Detectors Used in Medical X-Ray Detection
- 3.6 Key Points from this Chapter

CHAPTER THREE: MARKET FOR MEDICAL GAMMA RADIATION DETECTION

- 4.1 Nuclear Medicine
 - 4.11 Challenges faced by nuclear medicine
 - 4.111 Image-Guided Radiation Therapy (IGRT)
 - 4.1111 Proton therapy
 - 4.112 Radiotherapy, Phytotherapy Opportunities
 - 4.12 Gamma Cameras
 - 4.121 Technology improvements
- 4.2 Combined SPECT Techniques
 - 4.21 SPECT/CT
 - 4.22 SPECT/MRI
- 4.3 PET Detectors
 - 4.31 PET/CT
 - 4.32 PET/MRI
- 4.4 Main Suppliers of Detectors Used in Medical Gamma Radiation Detection
- 4.5 Key Points from this Chapter

CHAPTER FOUR: SUMMARY OF EIGHT-YEAR MARKET FORECASTS FOR RADIATION DETECTION EQUIPMENT IN MEDICAL/HEALTHCARE

- 5.1 Forecasting Methodology
- 5.2 Forecast of Radiation Detection Equipment in the Medical/Healthcare Market, by Type of Detector
- 5.3 Forecast of Radiation Detection Equipment Markets by End-User Sector
- 5.4 Forecast of Radiation Detection Equipment for Medical Diagnostics by Region/Country
- 5.5 Forecasts of Radiation Detection Equipment Used in Medical X-Ray Detection
- 5.6 Forecasts of Radiation Detection Equipment Used in Gamma Radiation Detection

ACRONYMS AND ABBREVIATIONS USED IN THIS REPORT

List Of Exhibits

LIST OF EXHIBITS

- Exhibit 1-1: Radiation Detectors: Selected Market Opportunities.
- Exhibit 2-1: Some of the Significant Technological Trends in CT Design.
- Exhibit 3-1: Some of the Important Radioisotopes and their Clinical Uses.
- Exhibit 4-1: Radiation Detection Equipment in the Medical/Healthcare Market, by Type of Detector (\$Millions)
- Exhibit 4-2: Radiation Detectors by Market Segment (\$ Millions)
- Exhibit 4-3: Market Share of Medical Radiation Detectors by Region (Percent)
- Exhibit 4-4: Market Size of Medical Radiation Detectors by Region (\$Millions)
- Exhibit 4-5: The Market for Medical Radiography Detectors.
- Exhibit 4-6: The Market for Medical Computed Tomography Radiography Detectors.
- Exhibit 4-7: The Market for Medical SPECT Detectors.
- Exhibit 4-8: The Market for Medical PET Detectors.

I would like to order

Product name: Radiation Detection In Medical and Healthcare Markets, 2014-2021

Product link: <https://marketpublishers.com/r/R9AF674DE14EN.html>

Price: US\$ 1,995.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/R9AF674DE14EN.html>
