Global Personal Emergency Response System (PERS) Market Analysis – 2018-2027

Personal emergency response system (PERS), also known as medical alert system or medical alarm, is a type of alarm system, especially designed to indicate and alert the presence of a threat which requires immediate attention and to call in emergency medical work force. Unlike conventional alarm systems which consists of a transmitter and is activated in case of emergency, in the same way, personal emergency response system transmits signals to alarm monitoring medical team, which then departs for the location where the alarm was called up. Usually, such medical alarms are used by disabled or aged people or those who are living alone. The global personal emergency response system (PERS) market is anticipated to achieve a CAGR of around 6% during the forecast period, i.e. 2019-2027. Factors such as rising prevalence of diseases and disorders including Alzheimer or epileptic seizures and heart strokes, along with the increasing focus of key players in the personal emergency response system (PERS) industry are anticipated to contribute significantly towards the growth of the global personal emergency response system (PERS) market. Additionally, increasing geriatric population, growing R&D activities in the healthcare industry, growing healthcare infrastructure and product launch and deliberate partnerships by several key players are some of the factors anticipated to drive the growth of the global personal emergency response system (PERS) market.

The global personal emergency response system (PERS) market consists of various segments that are segmented by type, component, end user, subscription model and by region. The component segment is further sub-divided into smoke detectors, bed sensors, fall detection sensors and others. Out of these, the smoke detectors segment, which held a market share of around 42% in the year 2018 is anticipated to cross a

value of around USD 2100 million by the end of 2027 by registering a CAGR of around 7% during the forecast period.

Based on region, the global personal emergency response system (PERS) market is segmented into North America, Europe, Asia Pacific, Latin America and Middle East & Africa. The market in Asia Pacific, which had accounted for around 31% share in the year 2018, is estimated to witness a CAGR of 5.5% over the forecast period and cross a value of around USD 1400 million by the end of 2027.
