Abstracts

Bio-pharmaceutical products are manufactured in the form of complex macromolecules developed through genetic manipulation of living organisms using gene cloning, recombination of DNA and cell fusion. The biotechnology industry comprises bio-pharmaceuticals, bio-agriculture, bio-informatics, bio-services, and bio-industry.

Bio-pharmaceuticals Industry in India (2018-2023)

Market insights:

The bio-pharmaceuticals market in India is expected to reach a value of INR 2,891.70 Bn in FY 2023, expanding at a compound annual growth rate (CAGR) of ~31.7% since FY 2018. India caters to nearly 50% of the global demand for pharmaceutical products, most of which are based on the usage of biotechnological applications. Currently, bio-pharmaceuticals is one of the fastest growing biotechnology segments in India. The significant bio-pharmaceutical clusters of India are located in Haridwar, Sikkim, Hyderabad, Vishakhapatnam, Chennai, Pondicherry, Mysore, Mumbai, Ahmedabad, and Delhi NCR.

Government initiatives and investments:

The major investors in the Indian bio-pharmaceutical market are AstraZeneca, Johnson & Johnson, GlaxoSmithKline (GSK), Nipro and Otsuka. In 2017, 46 mergers and acquisition (M&A) deals were signed in the Indian bio-pharmaceutical market,

generating business worth INR 94.77 Bn. The Indian government has taken the initiative to set up an electronic platform for regulating online pharmacies. 'Pharma Vision 2020' has been unveiled so that India can emerge as a global leader in terms of end-to-end drug manufacturing.

Key growth drivers of the market:

India comprises of ~0.13 Mn highly skilled and experienced scientists who serve as a strong support system for the business process of the bio-pharmaceutical industry. With the help of the educational qualifications and skillset of these people, India is considered to be a significant center for bio-pharmaceutical research and development (R&D), especially for vaccine manufacturing.

The Government of India has approved an investment of INR 15,000 Mn under the Innovate in India (i3) program, for collaboration of industrial organizations and academic organizations over the next five years. This program is considered to act as a significant action of the Government in its way of boosting bio-pharmaceutical production in the country.

Key deterrents to the growth of the market:

It often takes a long time for the manufacturing companies to launch a new market-ready bio-pharmaceutical product in India due to the existence of numerous regulatory challenges in the process.

Also, the Indian bio-pharmaceutical industry lacks proper infrastructure regarding limited government-sponsored laboratory space, consumables, chemical components, and equipment, which acts as a significant hindrance to the growth of the market.
