### Europe Blockchain Technology Market

Blockchain technology is used to record Bitcoin transactions via a global network of computers. It is a continuously growing list of blocks (record) that are linked and secured using cryptography. Each new block created is connected to the previous block via a “cryptographic Hash”. Europe holds the second most significant share in the Blockchain technology market. Europe is expected to grow at a CAGR of 35.8% (2018-2023) and generate a global revenue of USD 4.3 Bn by 2023. A European Blockchain observatory and forum hub has begun monitoring existing Blockchain initiatives, trends and potential risk. The forum will create more awareness that should drive the adoption of the technology in this region.

Europe dominates the global insurance market. Five major European insurance companies - Allianz, Aegon, Munich Re, Swiss Re and Zurich - have taken up the Blockchain initiative to provide faster and secured services to its clients. European banking is attempting to shift trade finance to Blockchain platforms.

EU5, which includes France, Germany, Italy, Spain, and the United Kingdom, dominates the market because of digitalization and early adoption of Blockchain technology.

Key growth factors:

Retail customers are now preferring digital platforms for making purchase/ payments. In order to provide continuous support, retailers are looking to adopt Blockchain technology for securing and streamlining processes. This would

further accelerate the adoption of Blockchain by retailers.

GDPR (General Data Protection Regulation) is expected to promote Blockchain technology to overcome barriers and ease cross-border payment

Threats and key players:

The decentralized characteristic of Blockchain technology clashes with European regulations on personal data protection. This hinders the adoption of the technology

The key players in this region are Microsoft, IBM, Accenture, Deloitte, and Capgemini
