

Wind Turbine Market in India 2014

<https://marketpublishers.com/r/WB2756FD406EN.html>

Date: February 2014

Pages: 124

Price: US\$ 950.00 (Single User License)

ID: WB2756FD406EN

Abstracts

The report is sent in 0-2 business days after order is placed.

Netscribes' latest market research report titled Wind Turbine Market in India 2014 mentions that renewable energy is gaining prominence within the country. Wind energy accounts for majority of the renewable energy generated in the country. With India facing continuous shortfall in the supply of energy required to cater to the demands of its growing population through conventional sources, the focus is shifting from conventional to renewable sources of energy. As more and more wind power projects are being planned for this reason, the market for wind turbines is also expected to grow. Various other reasons such as high prices and the lack of easy availability of raw materials for generating electricity through thermal plants are also responsible for driving growth within the market. However, the government's decision to withdraw various schemes that provided several incentives to wind energy producers in the past is having a negative impact on the market's growth. Off-shore wind energy generation, hybrid generators such as solar photovoltaic, wind and diesel as well as the advent of small wind turbines are some of the key trends that are being witnessed in the industry at present.

Several government and industry bodies are working towards the development of the market and various policy and regulatory incentives are being provided to wind energy producers. However, the market remains import dependent. Majority of the players operating in the market are foreign companies and there is stiff competition among these players. The advancements in technology and the resultant reduction in costs will ensure that the market will grow steadily over the next few years.

Contents

Slide 1: Executive Summary

MACROECONOMIC INDICATORS

Slide 2: GDP at Factor Cost: Quarterly (2010-11, 2011-12, 2012-13, 2013-14), Inflation Rate: Monthly (Jun 2013 – Nov 2013)

Slide 3: Gross Fiscal Deficit: Monthly (Feb 2013 – Jul 2013), Exchange Rate: Half Yearly (Aug 2013 – Jan 2014)

Slide 4: Lending Rate: Annual (2008-09, 2009-10, 2010-11, 2011-12), Trade Balance: Annual (2009-10, 2010-11, 2011-12, 2012-13), FDI: Annual (2009-10, 2010-11, 2011-12, 2012-13)

INTRODUCTION

Slide 5: India – Energy Scenario and Region-Wise Installed Capacity

Slide 6: Renewable Energy Scenario, Energy Market Segmentation and Renewable Energy Market Segmentation

Slide 7: Wind Power – Generation Procedure & Cost Component

Slide 8: Wind Turbine Generator Components

Slide 9: Turbine Technology Options

Slide 10: Types of Turbine Towers

MARKET OVERVIEW

Slide 11: Wind Turbine – Market Overview, Market Size & Growth (Value-Wise; 2007 – 2018e)

Slide 12: Market Segmentation - Geared vs. Gearless and Ownership of Installation (2012)

Slide 13: Cost Component Variation –Geared vs. Gearless (2011)

Slide 14-15: Indian Business Models

EXIM

Slide 16: Export of Wind Mills & Turbines – Overview, Size (Value-Wise; 2009-10 – 2012-13), Region-Wise Exports (Value-Wise; 2011-12, 2012-13)

Slide 17: Import of Wind Mills & Turbines – Overview, Size (Value-Wise; 2009-10 – 2012-13), Region-Wise Imports (Value-Wise; 2011-12, 2012-13)

DRIVERS & CHALLENGES

Slide 18: Drivers and Challenges – Summary

Slide 19-24: Drivers

Slide 25-28: Challenges

TRENDS

Slide 29: Key Trends – Summary

Slide 30-35: Major Trends in the Market

REGULATORY BODIES

Slide 36: Major Government Bodies

Slide 37: Major Associations

Slide 38: Policy and Regulatory Incentives

COMPETITIVE LANDSCAPE

Slide 39: Porter's Five Forces Analysis

Slide 40: Wind Turbine Market – Market Share

Slide 41: Manufacturers Offering Class II and Class III Wind Turbines

Slide 42-46: Competitive Benchmarking (FY 2012)

Slide 47-54: Major Public Players

Slide 55-110: Major Private Players

STRATEGIC RECOMMENDATION

Slide 111: Cost Reduction for Manufacturing WTG –Summary

Slide 112-118: Cost Reduction Techniques

Slide 119-122: MARKET ENTRY Strategies

APPENDIX

Slide 123: Key Ratios Description

Slide 124: Sources of Information

About

Market

Wind Energy has been the fastest growing renewable energy sector in the country till FY2012

With a cumulative installed capacity of over 'm' GW (by Dec 2012) wind power currently accounts for almost 'p'% of the total installed capacity in the renewable energy sector

The wind turbine sector is forecasted to grow at a CAGR of x% to reach 'm' GW by 2018

The market has slumped currently due to withdrawal of the flagship Scheme A and Scheme ? by the Government

Drivers

Huge Untapped Wind Power Potential

India remains Energy Deficient

Global Drive towards Clean Energy

Volatile Oil Prices

Depleting Coal Reserves

Challenges

Withdrawal of GBI and AD Schemes

Rise in Raw Material Prices

Land Acquisition Problems

Regulatory Bodies

Major Regulatory Bodies & their roles

Policy and Regulatory Incentives

Trends

Potential of Off-Shore Capacity

Vertical Integration

Hybrid Generators

Advent of Small Wind Turbines

I would like to order

Product name: Wind Turbine Market in India 2014

Product link: <https://marketpublishers.com/r/WB2756FD406EN.html>

Price: US\$ 950.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
