Abstracts

Maglev Train Market Overview

The global Maglev Train Market size was valued at USD 2.69 billion in 2024 and is predicted to reach USD 3.90 billion by 2030 with a CAGR of 6.4% from 2025-2030.

The factors such as growing urbanization, rise in diesel price and government investment towards sustainable transport infrastructure drives the market growth. However, the high infrastructure costs involved in manufacturing of maglev trains acts as restraining factor for the market. On the contrary, integrating wireless power transfer technology (WPTT) offers promising future opportunity to enhance the market. Moreover, top players namely, Hitachi, Alstom, Max Bogl and others are taking initiatives involving product launch and collaborations in order to enhance their market position and expand product offerings. These initiatives are expected to drive

innovations and adoption in this market, creating an efficient and super-fast travel ecosystem.

Urbanization Driving the Growth of the Maglev Train Market

The fast pace of urbanization is driving the demand for efficient, high-speed, and green modes of transportation that in turn accelerates the market growth. According to reports by the World Bank Group, 2023, currently, 56% of the world population, that scales close to around 4.4 billion people, are urban dwellers. City population is expected to be more than double by 2050, with nearly every 7 out of 10 people expected to settle in cities or metro areas. With increase in population rise in congested cities, conventional transportation systems are difficult to catch up, and that is accelerating the demand for high-capacity, congestion-free and environmentally friendly modes of transportation such as maglev.

Rising Diesel Prices Driving Growth in the Maglev Train Market

The rising price of diesel fuel is driving governments and the transportation industry towards energy-efficient means such as maglev train market demand. With lower running expenses and use of electric power, maglev technology offers a sustainable option for high-speed travel, cutting dependence on fossil fuels. Based on reports released by the International Road Transport Union, (IRTU) 2025, the present price for diesel in nations namely Ireland and Switzerland are estimated at approximately USD 2.06 and USD 2.01 per litre, respectively. Rising fuel prices are making it increasingly expensive to operate traditional diesel-powered rail systems, propelling maglev transport to the foreground.

Government Investment in Green Rail Infrastructure Driving Maglev Train Market Growth

Governments around the globe are investing more funds in green rail infrastructure such as maglev trains that is among the leading solutions for clean, high-speed transportation. With zero direct emissions, reduced energy consumption, and a reduced land footprint, maglev technology aligns perfectly with global sustainability goals, making it the ideal solution for future rail networks. As per reports published by World Bank Group, 2023, green bonds raised USD 2.5 trillion globally to support green and sustainable projects, accelerating the shift towards next-generation railway systems. This significant funding is driving the expansion of maglev systems, ensuring faster, cleaner, and more efficient transportation solutions.

High Infrastructure Costs Hindering Maglev Train Market Growth

The development of the maglev train market trends is hindered by the enormous costs associated with infrastructure development. This type of transport demands advanced technology and high-quality materials. Additionally, large land acquisition required, leads to much larger initial investments compared to traditional railway systems.

Integration of Wireless Power Transfer (WPT) Technology Unlocks Opportunity for Maglev Trains

Implementation of Wireless Power Transfer (WPT) technology holds a significant promise to improve the efficiency of maglev trains. By facilitating contactless, real-time charging from electromagnetic fields within the tracks, WPT poses the potential to eliminate use of overhead cables or battery storage, minimizing energy wastage and optimizing operational sustainability. With continuous advancements in inductive charging and power transmission efficiency, WPT integration also make maglev systems even more cost-efficient, dependable, and environmentally friendly.

Market Segmentations and Scope of the Study

The maglev train market report is segmented on the basis of type, technology, speed, track type, application and region. On the basis of type, the market is bifurcated into normal conducting magnetic levitation and super conducting maglevs. On the basis of technology, the market is segmented into electromagnetic suspension (EMS), electrodynamic suspension (EDS) and inductrack systems. Based on speed, the market is segmented into low-speed maglev (up to 100km/h), medium-speed maglev(100-300km/h) and high-speed maglev (above 300km/h). On the basis of track type, the market is bifurcated into elevated tracks, underground tracks and ground-level tracks. On basis of application, the market is classified into passenger transport and cargo transport. Regional breakdown and analysis of each of the aforesaid segments includes regions comprising of North America, Europe, Asia-Pacific, and Rest of The World (Row).

Geographical Analysis

Asia-Pacific dominates the maglev train market share is expected to maintain this position during the forecast period. The investment towards this high-speed rail technology in the region is leading the market at the forefront. As per reports published

by the Chinese government, 2023, China Railway Group Limited, spent USD 9.3 million on high-temperature superconducting (HTS) maglev technology in 2023 that helps advance the nation's goal for next-generation high-speed transportation. This investment funds research aimed at improving maglev efficiency and contributes to the region's involvement in high-speed rail development.

Moreover, the increasing cost of diesel in the region is driving different nations in the APAC region towards the use of energy-efficient and sustainable modes of transport namely maglev trains. Maglev technology is based on electricity and not fuel, presents a cost-effective option compared to diesel-based rail and road transport. According to reports released by IRU, 2023, the price of diesel in India is set to be around USD 1.04 per litre by 2025, adding further to operational costs of conventional railway and freight movement. This growing cost is propelling the use of magnetic levitation trains, that offer faster, efficient, and cost-effective transport in the long run.

On the other hand, the Europe region is anticipated to experience steady growth in the market during the forecast period. With the increase in the cost of air tickets, European tourists resort to other options that are not only cheaper but also faster simultaneously, and maglev trains are a superior choice in this domain. According to reports released by the International Air Transport Association, 2023, consumer fares paid for June 2023 travel were, on average, 16% higher than comparable fares in June 2019 for travel starting from Europe. This dramatic increase in airfare is forcing passengers and policymakers to consider high-speed rail options, such as maglev technology, for cheaper and more efficient mobility options.

Furthermore, train derailments and rail accidents in the region are prompting the demand for more advanced and safer modes of transport, and maglev trains are one of the most efficient substitutes in this domain. Unlike conventional rail transport systems, maglev technology comes with zero track contact, avoiding potential track failure and collision. For instance, in March 2023, the train accident mortality index in Greece rose to 36 people and left dozens injured, this showcases the weaknesses of conventional railway tracks. As the demand for safer transportation options grows, investing in maglev technology become essential, thereby boosting the market growth.

Competitive Landscape

Various market players operating in the maglev train industry includes Alstom SA, CRRC Corporation Limited, Central Japan Railway Company, Hyundai Rotem Company, SwissRapide AG, American Maglev Technology Inc., Max Bogl, and others.

These market players are adopting strategies such as collaboration and product launch to remain dominant in the market.

For instance, in October 2024, Hitachi and Alstom collaborated to create the design of the development stage of their new high-speed maglev trains for HS2 in the UK with passenger-focussed designs. This project result in the manufacturing of trains in the UK, ready for high-speed maglev travel.

Additionally, in June 2023, Max Bogl launched the Transport System Bogl (TSB), a fully automated, urban maglev transportation system. They constructed a demonstration track in China and are conducting feasibility studies for potential implementation in Germany.

Key Benefits

The report provides quantitative analysis and estimations of the maglev train industry from 2025 to 2030, which assists in identifying the prevailing market opportunities.

The study comprises a deep-dive analysis of maglev train market including the current and future trends to depict prevalent investment pockets in the market.

Information related to key drivers, restraints, and opportunities and their impact on the maglev train market is provided in the report.

Competitive analysis of the players, along with their market share is provided in the report.

SWOT analysis and Porters Five Forces model is elaborated in the study.

Value chain analysis in the market study provides a clear picture of roles of stakeholders.

Maglev Train Market Key Segments

By Type

Normal Conducting Magnetic Levitation

Super Conducting Maglevs

By Technology

Electromagnetic Suspension (EMS)

Electrodynamic Suspension (EDS)

Inductrack Systems

By Speed

Low-Speed Maglev (up to 100km/h)

Medium-Speed Maglev (100-300km/h)

High-Speed Maglev (above 300 km/h)

By Track Type

Elevated Tracks

Underground Tracks

Ground-Level Tracks

By Application

Passenger Transport

Cargo Transport

By Region

North America

The U.S.

Canada

Mexico

Europe

The U.K.

Germany

France

Italy

Spain

Denmark

Netherlands

Finland

Sweden

Norway

Russia

Rest of Europe

Asia-Pacific

China

Japan

1 INTRODUCTION

1.1 REPORT DESCRIPTION

1.2 RESEARCH METHODOLOGY

1.2.1 SECONDARY RESEARCH

1.2.2 DATA ANALYSIS FRAMEWORK

1.2.3 MARKET SIZE ESTIMATION

1.2.4 FORECASTING

1.2.5 PRIMARY RESEARCH AND DATA VALIDATION

2 GLOBAL MAGLEV TRAIN MARKET BY TYPE

2.1 OVERVIEW

2.2 NORMAL CONDUCTING MAGNETIC LEVITATION

2.2.1 NORMAL CONDUCTING MAGNETIC LEVITATION MARKET, BY REGION

2.2.1.1 NORTH AMERICA NORMAL CONDUCTING MAGNETIC LEVITATION MARKET, BY COUNTRY

2.2.1.2 EUROPE NORMAL CONDUCTING MAGNETIC LEVITATION MARKET, BY COUNTRY

2.2.1.3 ASIA-PACIFIC NORMAL CONDUCTING MAGNETIC LEVITATION MARKET, BY COUNTRY

2.2.1.4 REST OF THE WORLD NORMAL CONDUCTING MAGNETIC LEVITATION MARKET, BY COUNTRY

2.3 SUPER CONDUCTING MAGLEVS

2.3.1 SUPER CONDUCTING MAGLEVS MARKET, BY REGION

2.3.1.1 NORTH AMERICA SUPER CONDUCTING MAGLEVS MARKET, BY COUNTRY

2.3.1.2 EUROPE SUPER CONDUCTING MAGLEVS MARKET, BY COUNTRY

2.3.1.3 ASIA-PACIFIC SUPER CONDUCTING MAGLEVS MARKET, BY COUNTRY

2.3.1.4 REST OF THE WORLD SUPER CONDUCTING MAGLEVS MARKET, BY COUNTRY

3 GLOBAL MAGLEV TRAIN MARKET BY TECHNOLOGY

3.1 OVERVIEW

3.2 ELECTROMAGNETIC SUSPENSION (EMS)

3.2.1 ELECTROMAGNETIC SUSPENSION (EMS) MARKET, BY REGION

3.2.1.1 NORTH AMERICA ELECTROMAGNETIC SUSPENSION (EMS) MARKET, BY COUNTRY

3.2.1.2 EUROPE ELECTROMAGNETIC SUSPENSION (EMS) MARKET, BY COUNTRY

3.2.1.3 ASIA-PACIFIC ELECTROMAGNETIC SUSPENSION (EMS) MARKET, BY COUNTRY

3.2.1.4 REST OF THE WORLD ELECTROMAGNETIC SUSPENSION (EMS) MARKET, BY COUNTRY

3.3 ELECTRODYNAMIC SUSPENSION (EDS)

3.3.1 ELECTRODYNAMIC SUSPENSION (EDS) MARKET, BY REGION

3.3.1.1 NORTH AMERICA ELECTRODYNAMIC SUSPENSION (EDS) MARKET, BY COUNTRY

3.3.1.2 EUROPE ELECTRODYNAMIC SUSPENSION (EDS) MARKET, BY COUNTRY

3.3.1.3 ASIA-PACIFIC ELECTRODYNAMIC SUSPENSION (EDS) MARKET, BY COUNTRY

3.3.1.4 REST OF THE WORLD ELECTRODYNAMIC SUSPENSION (EDS) MARKET, BY COUNTRY

3.4 INDUCTRACK SYSTEMS

3.4.1 INDUCTRACK SYSTEMS MARKET, BY REGION

3.4.1.1 NORTH AMERICA INDUCTRACK SYSTEMS MARKET, BY COUNTRY

3.4.1.2 EUROPE INDUCTRACK SYSTEMS MARKET, BY COUNTRY

3.4.1.3 ASIA-PACIFIC INDUCTRACK SYSTEMS MARKET, BY COUNTRY

3.4.1.4 REST OF THE WORLD INDUCTRACK SYSTEMS MARKET, BY COUNTRY

4 GLOBAL MAGLEV TRAIN MARKET BY SPEED

4.1 OVERVIEW

4.2 LOW-SPEED MAGLEV (UP TO 100KM/H)

4.2.1 LOW-SPEED MAGLEV (UP TO 100KM/H) MARKET, BY REGION

4.2.1.1 NORTH AMERICA LOW-SPEED MAGLEV (UP TO 100KM/H) MARKET, BY COUNTRY

4.2.1.2 EUROPE LOW-SPEED MAGLEV (UP TO 100KM/H) MARKET, BY COUNTRY

4.2.1.3 ASIA-PACIFIC LOW-SPEED MAGLEV (UP TO 100KM/H) MARKET, BY COUNTRY

4.2.1.4 REST OF THE WORLD LOW-SPEED MAGLEV (UP TO 100KM/H) MARKET, BY COUNTRY

4.3 MEDIUM-SPEED MAGLEV (100-300KM/H)

4.3.1 MEDIUM-SPEED MAGLEV (100-300KM/H) MARKET, BY REGION

4.3.1.1 NORTH AMERICA MEDIUM-SPEED MAGLEV (100-300KM/H) MARKET, BY COUNTRY

4.3.1.2 EUROPE MEDIUM-SPEED MAGLEV (100-300KM/H) MARKET, BY COUNTRY

4.3.1.3 ASIA-PACIFIC MEDIUM-SPEED MAGLEV (100-300KM/H) MARKET, BY COUNTRY

4.3.1.4 REST OF THE WORLD MEDIUM-SPEED MAGLEV (100-300KM/H) MARKET, BY COUNTRY

4.4 HIGH-SPEED MAGLEV (ABOVE 300 KM/H)

4.4.1 HIGH-SPEED MAGLEV (ABOVE 300 KM/H) MARKET, BY REGION

4.4.1.1 NORTH AMERICA HIGH-SPEED MAGLEV (ABOVE 300 KM/H) MARKET, BY COUNTRY

4.4.1.2 EUROPE HIGH-SPEED MAGLEV (ABOVE 300 KM/H) MARKET, BY COUNTRY

4.4.1.3 ASIA-PACIFIC HIGH-SPEED MAGLEV (ABOVE 300 KM/H) MARKET, BY COUNTRY

4.4.1.4 REST OF THE WORLD HIGH-SPEED MAGLEV (ABOVE 300 KM/H) MARKET, BY COUNTRY

5 GLOBAL MAGLEV TRAIN MARKET BY TRACK TYPE

5.1 OVERVIEW

5.2 ELEVATED TRACKS

5.2.1 ELEVATED TRACKS MARKET, BY REGION

5.2.1.1 NORTH AMERICA ELEVATED TRACKS MARKET, BY COUNTRY

5.2.1.2 EUROPE ELEVATED TRACKS MARKET, BY COUNTRY

5.2.1.3 ASIA-PACIFIC ELEVATED TRACKS MARKET, BY COUNTRY

5.2.1.4 REST OF THE WORLD ELEVATED TRACKS MARKET, BY COUNTRY

5.3 UNDERGROUND TRACKS

5.3.1 UNDERGROUND TRACKS MARKET, BY REGION

5.3.1.1 NORTH AMERICA UNDERGROUND TRACKS MARKET, BY COUNTRY

5.3.1.2 EUROPE UNDERGROUND TRACKS MARKET, BY COUNTRY

5.3.1.3 ASIA-PACIFIC UNDERGROUND TRACKS MARKET, BY COUNTRY

5.3.1.4 REST OF THE WORLD UNDERGROUND TRACKS MARKET, BY COUNTRY

5.4 GROUND-LEVEL TRACKS

5.4.1 GROUND-LEVEL TRACKS MARKET, BY REGION

5.4.1.1 NORTH AMERICA GROUND-LEVEL TRACKS MARKET, BY COUNTRY

- 5.4.1.2 EUROPE GROUND-LEVEL TRACKS MARKET, BY COUNTRY
- 5.4.1.3 ASIA-PACIFIC GROUND-LEVEL TRACKS MARKET, BY COUNTRY
- 5.4.1.4 REST OF THE WORLD GROUND-LEVEL TRACKS MARKET, BY COUNTRY

6 GLOBAL MAGLEV TRAIN MARKET BY APPLICATION

6.1 OVERVIEW

6.2 PASSENGER TRANSPORT

- 6.2.1 PASSENGER TRANSPORT MARKET, BY REGION
 - 6.2.1.1 NORTH AMERICA PASSENGER TRANSPORT MARKET, BY COUNTRY
 - 6.2.1.2 EUROPE PASSENGER TRANSPORT MARKET, BY COUNTRY
 - 6.2.1.3 ASIA-PACIFIC PASSENGER TRANSPORT MARKET, BY COUNTRY
 - 6.2.1.4 REST OF THE WORLD PASSENGER TRANSPORT MARKET, BY COUNTRY

6.3 CARGO TRANSPORT

- 6.3.1 CARGO TRANSPORT MARKET, BY REGION
 - 6.3.1.1 NORTH AMERICA CARGO TRANSPORT MARKET, BY COUNTRY
 - 6.3.1.2 EUROPE CARGO TRANSPORT MARKET, BY COUNTRY
 - 6.3.1.3 ASIA-PACIFIC CARGO TRANSPORT MARKET, BY COUNTRY
 - 6.3.1.4 REST OF THE WORLD CARGO TRANSPORT MARKET, BY COUNTRY

7 GLOBAL MAGLEV TRAIN MARKET, BY REGION

7.1 OVERVIEW

7.2 NORTH AMERICA

- 7.2.1 NORTH AMERICA MAGLEV TRAIN MARKET, BY TYPE
- 7.2.2 NORTH AMERICA MAGLEV TRAIN MARKET, BY TECHNOLOGY
- 7.2.3 NORTH AMERICA MAGLEV TRAIN MARKET, BY SPEED
- 7.2.4 NORTH AMERICA MAGLEV TRAIN MARKET, BY TRACK TYPE
- 7.2.5 NORTH AMERICA MAGLEV TRAIN MARKET, BY APPLICATION
- 7.2.6 NORTH AMERICA MAGLEV TRAIN MARKET, BY COUNTRY
 - 7.2.6.1 UNITED STATES
 - 7.2.6.1.1 UNITED STATES MAGLEV TRAIN MARKET, BY TYPE
 - 7.2.6.1.2 UNITED STATES MAGLEV TRAIN MARKET, BY TECHNOLOGY
 - 7.2.6.1.3 UNITED STATES MAGLEV TRAIN MARKET, BY SPEED
 - 7.2.6.1.4 UNITED STATES MAGLEV TRAIN MARKET, BY TRACK TYPE
 - 7.2.6.1.5 UNITED STATES MAGLEV TRAIN MARKET, BY APPLICATION
 - 7.2.6.2 CANADA

- 7.2.6.2.1 CANADA MAGLEV TRAIN MARKET, BY TYPE
- 7.2.6.2.2 CANADA MAGLEV TRAIN MARKET, BY TECHNOLOGY
- 7.2.6.2.3 CANADA MAGLEV TRAIN MARKET, BY SPEED
- 7.2.6.2.4 CANADA MAGLEV TRAIN MARKET, BY TRACK TYPE
- 7.2.6.2.5 CANADA MAGLEV TRAIN MARKET, BY APPLICATION

7.2.6.3 MEXICO

- 7.2.6.3.1 MEXICO MAGLEV TRAIN MARKET, BY TYPE
- 7.2.6.3.2 MEXICO MAGLEV TRAIN MARKET, BY TECHNOLOGY
- 7.2.6.3.3 MEXICO MAGLEV TRAIN MARKET, BY SPEED
- 7.2.6.3.4 MEXICO MAGLEV TRAIN MARKET, BY TRACK TYPE
- 7.2.6.3.5 MEXICO MAGLEV TRAIN MARKET, BY APPLICATION

7.3 EUROPE

8 COMPANY PROFILES

- 8.1 ALSTOM SA
 - 8.1.1 COMPANY OVERVIEW
 - 8.1.2 COMPANY SNAPSHOT
 - 8.1.3 OPERATING BUSINESS SEGMENTS
 - 8.1.4 PRODUCT PORTFOLIO
 - 8.1.5 BUSINESS PERFORMANCE
 - 8.1.6 BUSINESS SEGMENTS
 - 8.1.7 GEOGRAPHIC SEGMENTS
 - 8.1.8 KEY STRATEGIC MOVES AND DEVELOPMENT
 - 8.1.9 PRIMARY MARKET COMPETITORS

8.2 CRRC CORPORATION LIMITED

8.2.1 COMPANY OVERVIEW

8.2.2 COMPANY SNAPSHOT

8.2.3 OPERATING BUSINESS SEGMENTS

8.2.4 PRODUCT PORTFOLIO

8.2.5 BUSINESS PERFORMANCE

8.2.6 BUSINESS SEGMENTS

8.2.7 GEOGRAPHIC SEGMENTS

8.2.8 KEY STRATEGIC MOVES AND DEVELOPMENT

8.2.9 PRIMARY MARKET COMPETITORS

8.3 CENTRAL JAPAN RAILWAY COMPANY

8.3.1 COMPANY OVERVIEW

8.3.2 COMPANY SNAPSHOT

8.3.3 OPERATING BUSINESS SEGMENTS

8.3.4 PRODUCT PORTFOLIO

8.3.5 BUSINESS PERFORMANCE

8.3.6 BUSINESS SEGMENTS

8.3.7 GEOGRAPHIC SEGMENTS

8.3.8 KEY STRATEGIC MOVES AND DEVELOPMENT

8.3.9 PRIMARY MARKET COMPETITORS

8.4 HYUNDAI ROTEM COMPANY

8.4.1 COMPANY OVERVIEW

8.4.2 COMPANY SNAPSHOT

8.4.3 OPERATING BUSINESS SEGMENTS

8.4.4 PRODUCT PORTFOLIO

8.4.5 BUSINESS PERFORMANCE

8.4.6 BUSINESS SEGMENTS

8.4.7 GEOGRAPHIC SEGMENTS

8.4.8 KEY STRATEGIC MOVES AND DEVELOPMENT

8.4.9 PRIMARY MARKET COMPETITORS

8.5 SWISSRAPIDE AG

8.5.1 COMPANY OVERVIEW

8.5.2 COMPANY SNAPSHOT

8.5.3 OPERATING BUSINESS SEGMENTS

8.5.4 PRODUCT PORTFOLIO

8.5.5 BUSINESS PERFORMANCE

8.5.6 BUSINESS SEGMENTS

8.5.7 GEOGRAPHIC SEGMENTS

8.5.8 KEY STRATEGIC MOVES AND DEVELOPMENT

- 8.5.9 PRIMARY MARKET COMPETITORS
- 8.6 AMERICAN MAGLEV TECHNOLOGY INC.
 - 8.6.1 COMPANY OVERVIEW
 - 8.6.2 COMPANY SNAPSHOT
 - 8.6.3 OPERATING BUSINESS SEGMENTS
 - 8.6.4 PRODUCT PORTFOLIO
 - 8.6.5 BUSINESS PERFORMANCE
 - 8.6.6 BUSINESS SEGMENTS
 - 8.6.7 GEOGRAPHIC SEGMENTS
 - 8.6.8 KEY STRATEGIC MOVES AND DEVELOPMENT
 - 8.6.9 PRIMARY MARKET COMPETITORS
- 8.7 MAX BOGL
 - 8.7.1 COMPANY OVERVIEW
 - 8.7.2 COMPANY SNAPSHOT
 - 8.7.3 OPERATING BUSINESS SEGMENTS
 - 8.7.4 PRODUCT PORTFOLIO
 - 8.7.5 BUSINESS PERFORMANCE
 - 8.7.6 BUSINESS SEGMENTS
 - 8.7.7 GEOGRAPHIC SEGMENTS
 - 8.7.8 KEY STRATEGIC MOVES AND DEVELOPMENT
 - 8.7.9 PRIMARY MARKET COMPETITORS

I would like to order

Product name: Maglev Train Market by Type (Normal Conducting Magnetic Levitation and Super Conducting Maglevs), by Technology (Electromagnetic Suspension (EMS), Electrodynamic Suspension (EDS) and Inductrack Systems), by Speed (Low-Speed Maglev (up to 100km/h), Medium-Speed Maglev (100-300km/h) and High-Speed Maglev (above 300 km/h)), by Track Type (Elevated Tracks, Underground Tracks and Others), and by Application (Passenger Transport and Others)—Global Opportunity Analysis and Industry Forecast 2025-2030
