## **Abstracts**

The Surgical Procedures Market size was 312762 thousand units in 2024, and is predicted to reach 375635 thousand units by 2030, with a CAGR of 3.1% from 2025 to 2030. As people grow older, they are more likely to develop age-related health issues such as cardiovascular diseases (CVDs), cancer, osteoarthritis, and others that may require surgical intervention. This, in turn, increases the demand for surgical procedures. With improved medical care and increased access to health services, there is an increase in the number of surgeries performed.

Moreover, older adults are becoming more aware of the importance of preventive care and seeking surgical procedures to prevent potential health issues. According to WHO, between 2015 and 2050, the proportion of the world's population over 60 years will nearly double from 12% to 22%. Governments around the world are investing in healthcare infrastructure and promoting the adoption of surgical procedures to improve the health of their citizens. This has created a favorable environment for the growth of the surgical procedures industry.

However, the high cost associated with surgeries can make surgical procedures unaffordable for many individuals, which can restrain the market growth. On the contrary, the introduction of AR and VR technologies to perform surgeries is expected to generate lucrative opportunities for the market in the coming years.

## Segment Overview

The global surgical procedures market is segmented on the on the basis of surgery type and geography.

By surgery type, the market is classified into gynecology surgery, cystectomy, sacrectomy, urology surgery, neurosurgery, orthopedic surgery, general surgery, thoracic surgery, and others.

Region-wise, the market is segmented into North America, Europe, Asia-Pacific, and RoW.

## Regional Analysis

Asia-Pacific market is projected to hold a dominant share by 2030

The rise in R&D activities by the hospitals and manufacturers of surgical devices creates an opportunity for the growth of surgical procedures in the region. For instance, in August 2022, the Torch Project was initiated by the Hospital Management Institute of the National Health Commission (NHC) and supported by Johnson & Johnson MedTech to provide young surgeons with standardized surgical skills training. This plan was expected to cover 2,000 healthcare institutions in China within three years. Such initiatives further propel the growth of the market.

Moreover, the rising cases of heart disease increase the number of surgeries associated with it. According to the Ministry of Health, Labour, and Welfare of Japan, about 162 men per 100,000 people died from heart disease in 2020. Heart diseases, excluding hypertensive heart diseases, were the leading cause of death among the male population in this country. At the same time, malignant neoplasm was the leading cause of death among females in 2021. Therefore, the demand for surgical procedures is expected to increase in the coming years to treat heart-related diseases.

## KEY BENEFITS

The surgical procedures market report provides a quantitative analysis of the current market and estimations from 2023 to 2030. This analysis assists in identifying the prevailing market opportunities.

The study comprises a deep-dive analysis of the surgical procedures market trends, including current and future trends for depicting prevalent investment pockets in the market.

The information related to key drivers, restraints, and opportunities and their impact on the surgical procedures market is provided in the report.

The competitive analysis of the market players along with their market share in the surgical procedures market is provided in the report.

The SWOT analysis and Porter's Five Forces model are elaborated in the study.

The value chain analysis in the market study provides a clear picture of the role of stakeholders.

## Contents

### 1. INTRODUCTION

- 1.1. REPORT DESCRIPTION
- 1.2. WHO SHOULD READ THIS REPORT
- 1.3. KEY MARKET SEGMENTS
- 1.4. RESEARCH METHODOLOGY
  - 1.4.1 SECONDARY RESEARCH
  - 1.4.2 DATA ANALYSIS FRAMEWORK
  - 1.4.3 MARKET SIZE ESTIMATION
  - 1.4.4 FORECASTING
  - 1.4.5 PRIMARY RESEARCH AND DATA VALIDATION

### 2. SURGICAL PROCEDURES MARKET- EXECUTIVE SUMMARY

- 2.1. MARKET SNAPSHOT, 2024 - 2030, UNITS

### 3. MARKET OVERVIEW

- 3.1. MARKET DEFINITION AND SCOPE
- 3.2. MARKET DYNAMICS
  - 3.2.1 DRIVERS
    - 3.2.1.1. RISING INCIDENCE OF CHRONIC DISEASES DRIVES THE GROWTH OF THE SURGICAL PROCEDURE MARKET
    - 3.2.1.2. TECHNOLOGICAL ADVANCEMENTS IN THE FIELD OF MEDICAL SCIENCE
    - 3.2.1.3. INCREASING ADOPTION OF AMBULATORY SERVICES BY INDIVIDUALS
    - 3.2.1.4. GROWING GERIATRIC POPULATION INCREASES THE DEMAND FOR SURGICAL PROCEDURES
  - 3.2.2 RESTRAINTS
    - 3.2.2.1. HIGH COST OF SURGICAL INSTRUMENTS RESTRAIN THE GROWTH OF THE SURGICAL PROCEDURES MARKET
    - 3.2.2.2. STRINGENT POLICIES BY THE REGULATORY BODIES
  - 3.2.3 OPPORTUNITIES
    - 3.2.3.1. INTRODUCTION OF AUGMENTED REALITY AND VIRTUAL REALITY (AR AND VR) DURING THE SURGICAL PROCEDURES.

### 4. GLOBAL SURGICAL PROCEDURES MARKET, BY SURGERY TYPE

*Surgical Procedures Market by Surgery Type (Gynecology Surgery, Urology Surgery, Neurosurgery, Cystectomy, Sac...*

#### 4.1. OVERVIEW
