Abstracts

The global market for regional aircraft, traditionally divided across jets & turboprops and dominated as well as marked by the duopoly of Bombardier & Embraer, has seen significant spurt in activity of-late with the growth in demand for larger jets offering more capacity & lower operating costs which has been & is being capitalized upon effectively by Embraer that held a 76% share of the global regional jets deliveries in 2012 with the strategic positioning of its E-Jets portfolio amid a very competitive market landscape which has also led to a significant growth in Embraer's market share to 54% through 2001-2012. Bombardier, on the other hand, has indicated towards its intentions clearly with the advent of C-Series Jets towards a shift in focus beyond the upper end of the price & performance spectrum of regional jet segment towards the lower end of the mainstream commercial jets segment with its ageing CRJ as the only mainstream contender against the E-Jets that have significantly eroded Bombardier's market share over the years and without a new, built from scratch aircraft introduction from the Bombardier stable over near term, Embraer is projected to grow its market share further to 63% through 2013-2015 as against 54% at the end of 2012. Additionally, Embraer's order intake through the first 7 months of 2013 has surpassed Bombardier by a factor of 2.5 standing at \$4.9 billion which is likely to bolster production rate of E-Jets over near term.

The global industry landscape for regional jets is poised for a major transformation with the advent of new players, especially, Sukhoi & Mitsubishi, possessing strong industrial capabilities, in addition, to other advantages emanating from their clean-sheet aircraft designs, competitive pricing & significant know-how of as well as presence across

emerging markets while simultaneously facing delays on account of development issues. Further, Embraer's move to introduce new E2 Jets to take on Bombardier's C-series & the latest industry incumbents by revamping its existing E-Jets portfolio is likely to amplify the overall competitive intensity in the industry significantly. Other key demand drivers for the industry, include, the anticipated replacement demand wave likely to originate from the U.S. market over near term, technological innovations, especially, with the geared turbofan engines from P&W delivering enhanced fuel efficiency & a commensurate reduction in operating costs as well as total cost of ownership, uncertainty over oil prices and steady demand originating from emerging markets, especially, China, Russia, India & the Middle East through 2030 with a rapidly growing middle-class segment. Key challenges for the industry, on the other hand, include a need to enhance overall fuel efficiency through technological developments to counter rising oil price trend and to reduce overall CO2 emissions. Overall, projections by Bombardier indicate towards a cumulative demand for 12,800 new regional jets through 2032 worth \$646 billion spearheaded by the 100-149 seats segment that is projected to require 6,900 new aircraft deliveries worth \$460 billion, as per latest projections by Bombardier.

Against this backdrop, the report analyzes the global regional aircraft industry and provides strategic insights into the key industry trends, challenges & risk factors that are likely to shape the future of the industry followed by an insightful industry SWOT & Force Field Analysis and strategic outlook for the industry for 2014.

Excerpts/Highlights from the report:

1. Analysis of Embraer's overall product development strategy for enhancing its market leadership further.
2. Analysis of the anticipated change in industry landscape & competitive intensity with the advent of a string of new aircraft programs from latest industry entrants, especially, COMAC's ARJ & Mitsubishi's MRJ entering into service and the potential impact on the industry's progression.
3. Analysis of Bombardier's foray into the lower end of the mainstream aircraft market segment with its flagship C-Series and the potential impact on further evolution of the regional jets segment with CRJ left as the only contender to take on E-Jets.
4. ATR's plans to capitalize on the rising global oil price trend with its more fuel efficient turboprops as compared with jets with Turboprop aircrafts projected to account for about 48% of the 60-99 seats segment through 2032.
5. New aircraft development by most key OEMs offering enhanced fuel efficiency, superior cabin comfort, optimized performance characteristics & significantly reduced

environmental footprint; is a key demand driver for new aircraft with airlines looking at replacing their ageing aircraft fleets.

6. Analysis of growing preference for larger aircrafts by regional airlines delivering enhanced fuel efficiency & better operating economics subsequently with airlines focusing towards fleet optimization & enhanced operating efficiency.

7. Emerging markets likely to play a strategic role in new aircraft demand with their rapidly rising middle-class populations and above average GDP growth rates driving travel demand.

8. Analysis of Global Oil price trend and the commensurate, potential implications for new aircraft demand

9. Analysis of Key Technological Trends, Innovations & Developments Likely to Shape the Future of the Industry

Usage & Relevance:

The report provides & will be useful for:

Strategic Analysis and Vital Inputs essential for Strategic Planning & Decision-Making Process

Analysis of inherent Industry Strengths & Weaknesses

Identification & Analysis of Imminent Opportunities & Emerging Potential Threats

Gaining access to Key Industry Trends & Insights; crucial inputs for Decision-Makers

Analysis of Forces Driving and Restraining the Industry & their overall Dynamics

Identifying & highlighting areas for making Potential Strategic Changes, Adjustments and

Realignment of the internal strategy framework in-sync with emergent trends

Strategic Industry Outlook for 2014

For Whom:

The report would be essential for those having strategic interest in the Global Regional Aircraft Industry & will be especially useful for key decision makers, top management of companies, suppliers, vendors, current & potential investors, industry & company analysts & those associated with the industry.

Highlight:

The report is comprehensive yet concise & compact at the same time; built on the Microsoft PowerPoint platform; thus, rendering it custom-built for meetings & presentations while enabling & ensuring prompt and informed decision making as a ready self-reckoner.

Contents

SECTION - 1

Global Regional Aircraft Industry - Key Industry Trends

SECTION - 2

Key Industry Issues, Challenges & Potential Risk Factors

SECTION - 3

Global Regional Aircraft Industry - SWOT Analysis

Strengths to Leverage on

Weaknesses to Improve Upon & Offset

Opportunities to Capitalize on

Threats to Counter Mitigate, Negate & Overcome

SECTION - 4

Force Field Analysis - Global Regional Aircraft Industry

Driving Forces

Restraining Forces

SECTION - 5

Strategic Industry Outlook for 2014
