Abstracts

The First and probably the Longest aviation super-cycle of the 21st century; driven by a multitude of favourable macroeconomic factors and spanning a 15 year period since 2003; has created a significant order backlog for the industry which is likely to provide significant propulsion to the aviation industry value chain over the next decade. The OEMs have been focused strongly on ramping up aircraft production rates to meet delivery schedules with aircraft deliveries by the industry in 2018 likely to reach a record high with production output on key aircraft programs going up translating into top line growth for the industry.

The order backlog across the OEMs is dominated by the narrow body aircraft segment in volume terms and by the wide body aircraft segment in value terms. Next generation aviation turbofan engines, featuring a high bypass ratio and extensive usage of technological innovations, from the competing engine powerhouses have just entered service or are anticipated to make their debut over near term and are likely to form a major chunk of new deliveries over medium term given the composition of order backlog across aircraft OEMs.

The technology landscape across industry is evolving radically with hybrid-electric propulsion technologies for commercial aircrafts, aimed at reducing CO2 emission levels drastically while scaling down operating costs substantially, likely to become a functional reality by the middle of next decade with an all European industry consortium being one of the largest cohorts focused on pursuing R&D on the electric propulsion

technology. Additionally, resurgence of supersonic air travel, with some industry backed start-ups actively pursuing the development of prototypes targeting an EIS of early to mid-2020s; is likely to bring the next wave of technology led disruption to the industry.

Airlines profitability continues to be on the upward growth trajectory with 2018 likely to be another boom year for the airlines with the profitability projected to register double digit growth rate to reach \$38.4 billion in 2018, despite the spike in crude oil prices & pressures from escalating labour costs, which overall augurs well for the engine manufacturers from the MRO revenues standpoint.

The engine manufacturers are readying up their industrial base for a planned, major production ramp up over near term to meet delivery timelines with some transitioning from production of previous generation engines to latest engine programs. Pratt & Whitney, especially, has a tough task ahead with order intake for its GTF engines taking a hit in 2017 and the latest technology glitch episode on the PW1100G likely to again play a spoilsport for Airbus and Bombardier in 2018, with reference to aircraft deliveries, which are likely to be impacted once again. Further, 2018 is going to be an important year for the industry with three new aircraft programs scheduled to enter service, led by, Boeing's 737 MAX 9, Airbus A321 LR and Embraer's E190-E2, thereby, providing CFM with opportunities to further up the ante on Pratt & Whitney in the narrow body aircraft segment with its LEAP engines family which has really made a head start. Additionally, Boeing's proposed New Mid-market Airplane (NMA); Boeing's first scratch-up commercial aircraft program since 787 in 2003; is going to be the key growth pie being looked at avidly by all engine manufacturers over near term with a sole source strategy likely to be pursued by Boeing and the three way engine competition apparently stacked in favour of CFM.

The 2018 edition of this annual publication provides comprehensive analysis and key insights into the Strategies & Plans being conceptualized & implemented by the World's 4 leading commercial aircraft Turbofan Engine manufacturers for the near to medium term horizon as the industry continues on its strong growth trajectory. The report is unique with reference to its core focus on and deep qualitative analysis of strategies & plans for the industry OEMs. The report also provides a comprehensive SWOT framework analysis on all 4 industry players covered in the report providing useful insights into each player's respective strengths and weaknesses. The report concludes with analysis of key trends, market conditions, potential growth opportunities and demand growth projections for the global commercial aircraft turbofan engines market through 2036.

Relevance & Usefulness: The report will be useful for:-

Strategic Planning, Assessment & Decision-Making Processes

Competitor Analysis & Comparative Analysis of covered Industry Players

Identification of & Insights into Potential Growth Opportunities & Avenues

Analysis of Near to Medium Term Strategy Focus and Key Strategies & Plans for all Engine Manufacturers

Medium Term Strategic Outlook, Inputs on Market Evolution & Growth Projections through 2036

Analysis of Emerging Industry, Market & Technology Trends

Contingency planning for current Strategies & Programs

Identifying & highlighting areas for making potential Strategic Changes, Adjustments & Realignment

Analysis of Forces Driving as well as restraining the Industry & their overall Dynamics

For Whom: Business Leaders & Key Decision-Makers across Industry Value Chain

The report will be essential for Key Decision-Makers & Senior Industry Executives. The report will be especially useful for Program Managers, Procurement Managers, Airlines, Top Management of Industry Players & Other Companies, Industry OEMs, Suppliers, Vendors, MRO Services Providers, Technology & Other Services Solutions Providers and other Key Players in the Industry Value Chain. The report will also be useful for existing & potential Investors, Industry & Company Analysts, M&A Advisory Firms, Strategy & Management Consulting Firms, PE Firms, Venture Capitalists, Financing & Leasing Companies, Researchers and all those associated with the industry or any of the Engine Manufacturers covered in the report.

Contents

SECTION- 1

Business Structure & Snapshot - For All 4 Engine Manufacturers

- a) Founded
- b) Headquartered
- c) Business Segments
- d) Employees
- e) Product Portfolio - Major Engine Families, Presence on Aircraft Programs and Key Competitors
- f) Market Capitalization
- g) Key Executives
- h) Shareholding Pattern & Structure

SECTION – 2

Financial Performance Snapshot –Charts & Analysis for each Company:

1. REVENUE BASE & GROWTH TREND
2. REVENUES SPLIT BY KEY SEGMENTS
3. REVENUES SPLIT BY KEY GEOGRAPHIC MARKETS & REGIONS
4. GROSS EARNINGS & MARGIN TREND
5. OPERATING EARNINGS & OPERATING MARGIN TREND
6. RETURN ON SALES TREND
7. PROFITABILITY GROWTH TREND
8. CASH FLOW FROM OPERATIONS
9. R&D EXPENDITURE TREND
10. CAPEX TREND

SECTION – 3 - STRATEGIC POSITIONING & SWOT ANALYSIS – FOR EACH OF THE 4 KEY ENGINE MANUFACTURERS

Strengths to be Leveraged

Weaknesses to Overcome

Opportunities for Growth

Threats to be Mitigated

SECTION – 4

Strategy Focus - For Each of the Top 4 Commercial Aircraft Turbofan Engine

Manufacturers

GE Aviation
Pratt & Whitney
Rolls Royce
Safran (CFM)

SECTION – 5

Key Strategies & Plans – For Each of the Top 4 Commercial Aircraft Turbofan Engine

Manufacturers -

Comprehensive Analysis of Key Strategies & Plans for each Engine Manufacturer

Product & Services Portfolio Strategies & Plans
Market Specific Strategies & Plans
R&D Strategies & Plans
Growth Strategies & Plans
Business & Corporate Strategies & Plans
Sales & Marketing Strategies & Plans
Production/Manufacturing Strategies & Plans
Financial Strategies & Plans
Acquisitions, Strategic Alliances & JVs
Other Strategies & Strategic Initiatives

SECTION – 6

Global Commercial Aircraft Turbofan Engines Market - Force Field Analysis –

Analysis of Driving & Restraining Forces and their Overall Dynamics

Driving Forces
Restraining Forces

SECTION – 7

Key Trends

Industry Trends
Market Trends
Technology Trends

SECTION – 8

Key Issues, Challenges & Risk Factors

SECTION – 9

Strategic Market Outlook – Commercial Aircraft Turbofan Engines Market - 2017-2036

9.1 Analysis of Emerging Market Scenario for Commercial Aviation Sector

9.2 Global Demand Outlook – Commercial Aircrafts – 2017-2036

9.3 Demand Growth Projections for Commercial Aircrafts through 2036 –

9.3.1 Narrowbody

9.3.2 Widebody

9.3.3 Regional Jets

9.4 Demand Growth Projections for Aviation Turbofan Engines 2017-2036 –

9.4.1 Engines Demand Forecasts - in Numbers

9.4.2 Value of Projected Engines sales over the forecast period - In \$Trillion

9.5 Engines Demand Projections by Market Segments – In Units and Value – Through 2036

9.6 Engines Demand Forecasts by Thrust Class - In Units and Value – Through 2036

9.7 Engines Demand Forecasts by Geographic Regions - Through 2036 - In Units and Value

North America

Europe

Asia-Pacific

South America

Middle East & Africa
