Abstracts

The report analyzes the overall, near to medium term Strategy Focus and provides Insights into the Key Strategies & Plans being conceptualized & pursued by Bombardier Inc. as the company readjusts overarching strategic focus on the business jets segment spearheaded by the Global 7000 & 8000 aircraft programs post the certification and planned production ramp up of the troubled C-Series. The Global Business Jet market continues to make slow demand recovery spearheaded by continued economic recovery underway in the U.S., the introduction & certification of new business jet programs ,especially, in the super midsize segment by industry OEMs and continued, strong demand preference for heavy jets. The report also incorporates business and financial analysis on the company besides analyzing likely market evolution over near to medium term. The report concludes by providing comprehensive market outlook over medium term with demand projections across aircraft segments & key geographic markets & regions which indicates difficult demand projections for 2016 and 2017 with a weaker global macroeconomic outlook and complex as well as challenging global geo-political environment. However, services, especially, systems upgrade, MRO & aircraft customization are likely to drive slight to moderate growth over near term. The market demand for business jets is likely to improve slightly in 2017 and significantly from 2018 onwards.
