Abstracts

The Global Military Aviation Turbofan Engines market has been on a strong growth trajectory propelled by an unprecedented resurgence witnessed in defense spending over the recent years driven by the rapid evolution of geopolitical dynamics & equations with a major shake-up & whittling down of the traditional, rule-based world order with a militarily ascending China and a resurgent Russia. The Global Defense spending has been on a major upswing; registering a 2.6% year on year increase to reach \$1.98 trillion for 2020 despite a 4.4% decline in world GDP; led by the return to great power competition amongst leading geopolitical powers spearheaded by the R&D-led technological evolution.

The realignment of U.S. defense spending focus on competing with near peer adversaries and maintaining its traditional overmatch over adversaries has accelerated the pace of replacement of ageing equipment marked by the award of several new defense contract awards over the recent years which remain a key focus area for the industry given their strategic nature, scale as well as scope & long term horizon. The rapid development of the B-21 Raider LRSB program apart from the contract awards for the T-7 Red Hawk Trainer and the MQ-25 Stingray UAS programs are prime examples & hallmark of this defense renaissance with many upcoming defense programs still in the offing, especially, the big ticket JMR-FVL program geared towards development of next generation rotorcrafts for the U.S. defense forces.

Defense spending has been on a sustained growth trajectory in the EU as well, over the recent years, with steady increases witnessed in defense budgets across France,

Germany and the U.K. auguring well for the joint Franco-German defense programs going forward with the European Aerospace & Defense industry witnessing a growing trend towards pursuit of joint defense development programs. The developmental efforts on the sixth generation combat aircraft programs in Europe have been led by the Dassault-Airbus team on the Franco-German joint FCAS program apart from the U.K. which has been actively pursuing the ambitious, Tempest fighter aircraft program. The U.S. efforts on the 6th gen fighter have so far been led by the NGAD program.

The outbreak of COVID-19 pandemic globally in early 2020 has had an unprecedented impact on the world economy, which contracted by 4.4%, thereby putting tremendous pressure on government finances across most parts of the world with the same also likely to impact defense spending across traditional markets over medium term while defense budgets across nations in the Asia-Pacific region are projected to retain their original, pre-COVID growth trajectories. Further, strategic & long term programs are unlikely to be impacted by the economic pressures across most parts of the world going forward.

Against this backdrop, the report provides a comprehensive Comparative SWOT framework analysis & Near Term Business Outlook on the Top 4 Industry OEMs in the Global Military Aviation Turbofan Engines market. The report analyzes as to how the key industry OEMs are positioned, based on their Strengths & Weaknesses, and are gearing up for the highly dynamic & rapidly evolving market landscape with reference to near-term Challenges, emerging Opportunities and potential Threats. The report also provides an analysis of key trends, issues & challenges likely to shape the industry's future, outlining potential growth opportunities & projecting market outlook as well as demand growth projections for the near to medium term horizon.

For Whom: Key Decision-Makers across Industry Value Chain

Key Decision-Makers

Program & Procurement Managers, Defense Departments & Executives

Top Management of Industry Players & Other Companies

Industry OEMs & Technology/Other Solutions Providers

Suppliers, Vendors and other Key Players in the Industry Value Chain

Associated Equipment Manufacturers & Technology Solutions Providers

Existing & Potential Investors

Industry & Company Analysts

M&A Advisory Firms

Strategy & Management Consulting Firms

Researchers and all those associated with Military Aviation and/or the Aerospace & Defense industry

Features, Benefits & Reasons to Procure:-

Quick Macro View and Big Picture Analysis

Blend of Quantitative & Qualitative Analysis for Strategic Planning Process

Quality & Reliability backed by over a decade of Research and Coverage of the Industry

Detailed Analysis on OEMs

Visual Representation enabling Easy Comprehension

Meetings & Presentation Ready Format for Quick Application

Superior & Enriched User Experience with Incorporation of Relevant Images, Graphs & Infographics

Contents

SECTION – 1

Global Military Aircraft Turbofan Engine Manufacturers - Business Snapshot - Pratt & Whitney, Rolls Royce, GE Aviation, Safran

- a) Founded
- b) Headquartered
- c) Business Segments
- d) Product Portfolio
- e) Revenue Base & Profitability
- f) Market Capitalization
- g) Key Executives
- h) Shareholding/Ownership Structure

SECTION – 2

Financial Performance Analysis – Key Industry OEMs

- 1. Revenue Base & Growth Trend
- 2. Revenues Split by Key Segments
- 3. Revenues Split by Key Geographic Markets & Regions
- 4. Gross Earnings & Margin Trend
- 5. Operating Earnings & Operating Margin Trend
- 6. Return on Sales Trend
- 7. Profitability Growth Trend
- 8. Cash Flow from Operations
- 9. R&D Expenditure Trend
- 10. CAPEX Trend
- 11. Order Intake & Engine Deliveries Trend

SECTION – 3

Comparative SWOT Analysis – On Key Industry OEMs

- Strengths to be Leveraged
- Weaknesses to be worked on
- Opportunities to be capitalized upon
- Threats to be negated & mitigated

SECTION – 4

Comparative SWOT & Business Outlook - 2021 - Goba Top 4 Military Aviation Turbofan Engine Manufacturers - Rol...

Comparative Analysis of Strengths – Key Military Aircraft Turbofan Engine Manufacturers

GE Aviation
Pratt & Whitney Inc.
Rolls Royce Holdings plc
Safran SA

SECTION – 5

Comparative Analysis of Weaknesses - Key Military Aircraft Turbofan Engine Manufacturers

GE Aviation
Pratt & Whitney Inc.
Rolls Royce Holdings plc
Safran SA

SECTION – 6

Business Outlook Analysis – 2021

GE Aviation
Pratt & Whitney Inc.
Rolls Royce Holdings plc
Safran SA

SECTION – 7

Key Trends

Market Trends
Technology Trends

SECTION – 8

Key Issues, Challenges & Risk Factors

SECTION – 9

Global Military Aviation Turbofan Engines Market – Force Field Analysis - Analysis of Driving & Restraining Forces and their Overall Dynamics

Driving Forces
Restraining Forces

SECTION – 10

Strategic Market Outlook – Global Military Aircraft Turbofan Engines Market – 2020-2034

10.1: Military Aviation Turbofan Engines Market – 2020-2034 – Projected Engine Deliveries – In Units

10.2: Military Aviation Turbofan Engines Market – 2020-2034 – Projected Engine Deliveries – In Value Terms – In \$Billion

10.3: Projected Engine Deliveries Split by Segments

I would like to order

Product name: Comparative SWOT & Business Outlook - 2021 - Gobal Top 4 Military Aviation Turbofan Engine Manufacturers - Rolls Royce, Pratt & Whitney, GE Aviation, Safran

Product link: <https://marketpublishers.com/r/CB2BF77DF14DEN.html>

Price: US\$ 875.00 (Single User License / Electronic Delivery)
