OVERVIEW:

This Strategic Report Analyzes & provides Key Insights into the Global Automotive Industry based on a comprehensive industry analysis through the Strategic Factor Analysis Summary (SFAS) framework against the backdrop of an evolving industry landscape & shifting global dynamics amid difficult global macroeconomic environment as well as conditions.

Strategic Factor Analysis Summary(SFAS) matrix, also referred to as Quantitative SWOT Analysis, is a framework developed by T. L. Wheelen and J. D. Hunger, which is used widely as a key strategic analysis & planning tool.

The framework generates a snapshot of the prevailing, overall strategic equation for the industry by identifying, weighing, prioritizing & ranking strategic factors in the internal & external environment based on their significance & potential degree of impact along-with the industry's corresponding response to the factors.

The framework, thus, scores over the traditional SWOT analysis framework in terms of its ability to quantify strengths, weaknesses, opportunities & threats respectively based on the potential degree of effect of each strategic factor being analyzed and the industry's commensurate degree of responsiveness to that thereby making it much more effective from the perspective of strategic planning and analysis.

USAGE & RELEVANCE:

The report will provide & will be useful for:

Including Analysis as Vital Inputs for Internal Strategic Planning & Decision-Making Process
