Abstracts

The Global Business Jet Market has been on the comeback trail, after facing headwinds for a number of years, as the U.S. economy maintains its growth momentum & gains further traction while most other, key economies across the world are on the upswing as well. Portfolio refresh through new introductions, reinforcement of presence across key markets & regions and services portfolio expansion have been the key focus areas for industry OEMs in an ameliorating demand environment amid a complex and highly uncertain global macroeconomic environment. The second half of year 2018 is likely to witness the entry into service of two key, long awaited aircraft programs, namely, G500 and Global 7500 from Gulfstream and Bombardier respectively. However, the industry's expectation for a long awaited breakout of demand growth from the typical range bound movement; which has become the new normal for the industry; is likely to be missed in 2018 as well with the recent onset of trade wars posing a significant threat to the ongoing global economic recovery itself and the spike in global crude oil prices & input costs challenging & putting pressure on profitability. How adroitly the industry players navigate this labyrinth, marked by policy uncertainty, rising input & operating costs amid a pitched battle over tariffs, while holding their ground & adapting to situations will prove to be decisive going forward.

REPORT STRUCTURE:

The report analyzes the Global Business Jet market with focus on a balanced blend of quantitative & qualitative analysis.

Part 1: Analysis of Market Structure, Size & Competitive Landscape

Market Structure & Key Segments

Current market size

Demand drivers

Competitive landscape for business jets

Part 2: Provides detailed analysis on key industry OEMs, including,
